

Revenue Equipment Maintenance

Joseph S. Simonetti Jr.

*Chicago Transit Authority,
Revenue Equipment Maintenance Technician
Chicago, IL*

2011 Fare Collection Workshop

What is Maintenance?

Definition: The work of keeping something in proper condition

- Qualified Staff
- Work Order systems and operational tools
- History of the defects
- Response time and staff support
- Inventory control
- What is good maintenance
- Preventative maintenance
- Retrofitting of equipment

Why Is Maintenance Important To A Transit Agency?

- *Good Maintenance relates to good customer service*
- Customer confidence and perception of the transit agency begins at the fare equipment
- Every customer touches the fare equipment at least twice each day
- Customers will have confidence in the operation of the equipment
- Customer satisfaction
- *Lower operating and capital costs*
 - ✓ Fewer defects
 - ✓ Less free riders
 - ✓ Longer life of fare equipment

Work Order Systems and Operational Tools

- Problem Notification
 - ✓ Manual
 - ✓ Manual / automated
 - ✓ Fully automated
- Handheld device for employee
 - ✓ Blackberry
 - ✓ Web based phone

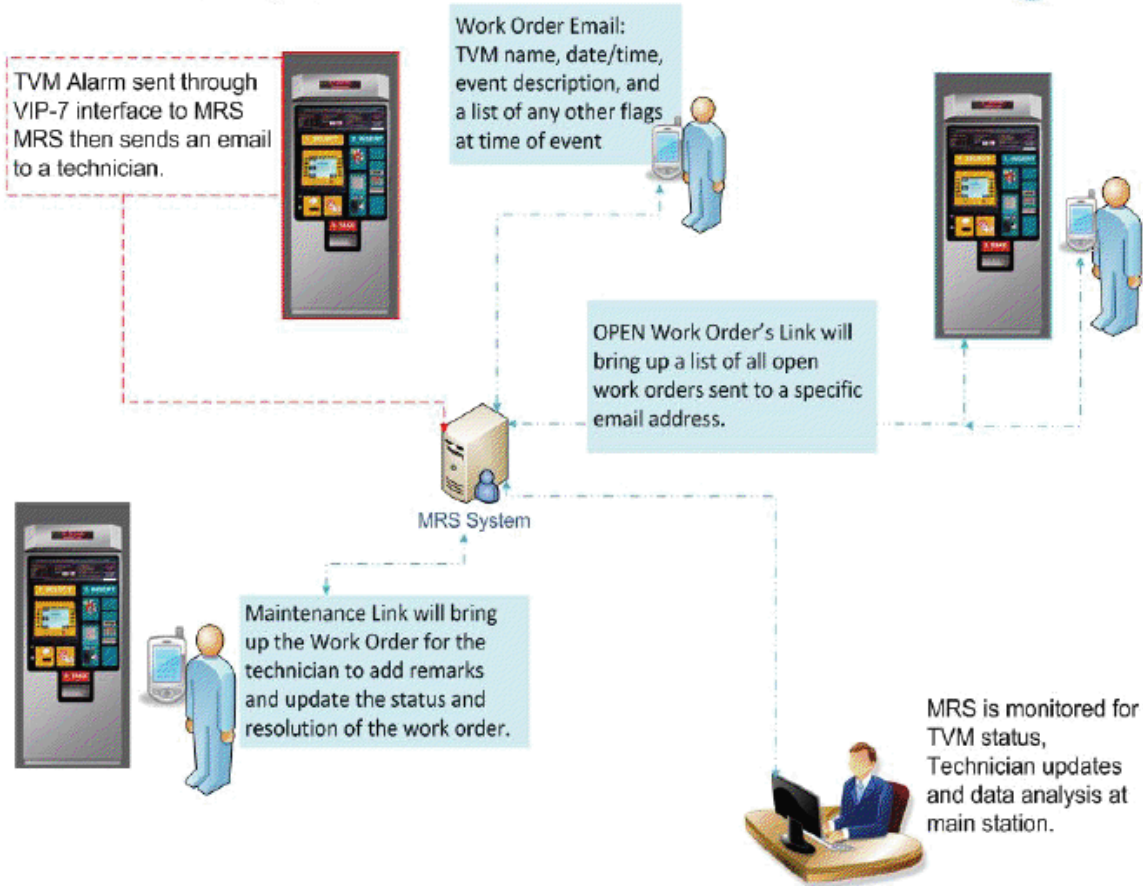

Manual and Automated Work Order System

Fully Automated Work Order system

Automated Fare Management
Maintenance Reporting System

productive solutions
SECURITY IN THE SOLUTIONS
AT YOUR SERVICE TECHNOLOGY

Tracking History Of Defects
