Prior Insurance Structure

Access Excess Liability – Following Form \$5,000,000 limit excess of \$5,000,000 excess of \$1,000,000
Access Excess Liability – Following Form \$5,000,000 limit excess of \$1,000,000
Access Lessor's Contingent & Excess Liability – Covers Over Leased Vehicles \$1,000,000 liability limit excess of \$1,000,000 Providers' limit

Contractor A
\$1,000,000 liability limit
97 vehicles

Contractor B
\$3,000,000 liability limit
Excess of \$2,000,000 SIR
122 vehicles

Contractor C
\$1,000,000 liability limit
127 vehicles

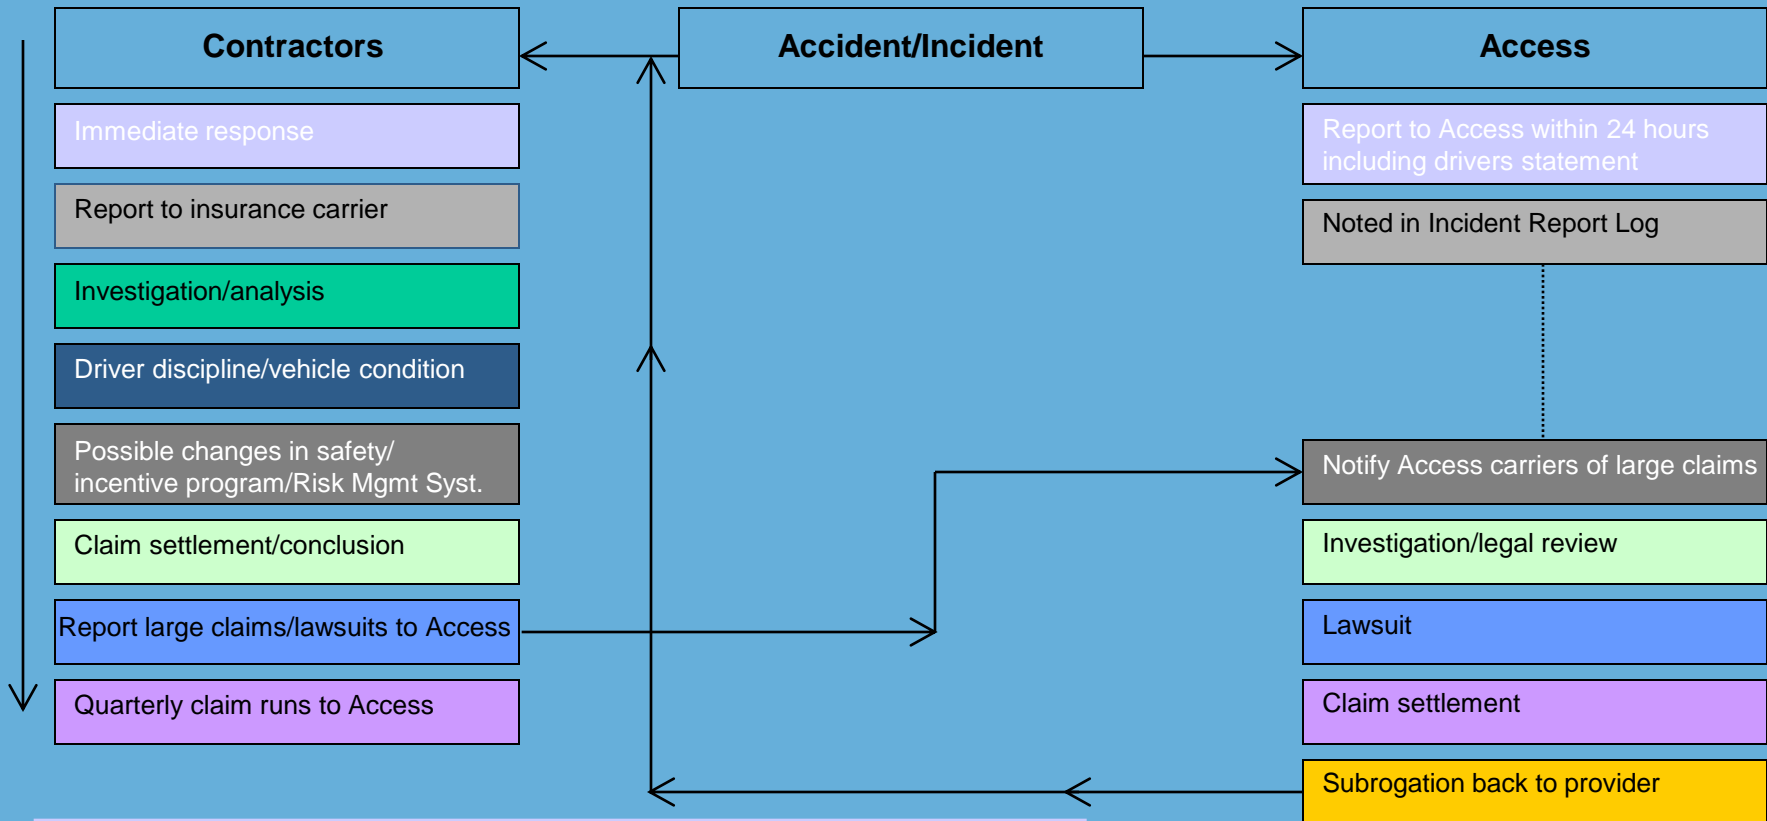

Contractor D
\$1,000,000 liability limit
89 vehicles

Taxi Service

- Underlying insurance notes:**
1. Contractors required to name Access as additional insured.
 2. Coverage is required to be primary and non contributory with any coverage carried by Access.

Prior Claim Reporting

Claim reporting notes:

1. After initial incident report, no additional information is given to Access.
2. Incident Report Log is not updated by Access, no claim amounts are provided.
3. Quarterly claim runs are not being provided to Access regularly.
4. Access not notified of large claims until it becomes a lawsuit.

Prior Insurance and Claim Reporting Structure

Disadvantages:

- Low limit of liability insurance required from contractors and low total limits purchased by Access
- No coverage on Access' Excess policies for taxis
- Inconsistent handling of claims
 - four different carriers, claim representatives, and claim systems

Prior Insurance and Claim Reporting Structure

Disadvantages:

- After the initial incident report, Access is out of the loop and dependent on the Contractor to provide updated claim status reports. Large claims come back to Access many months later.
- No opportunity for Access to use claim information to make changes to safety practices, driver training standards, and vehicle maintenance practices.

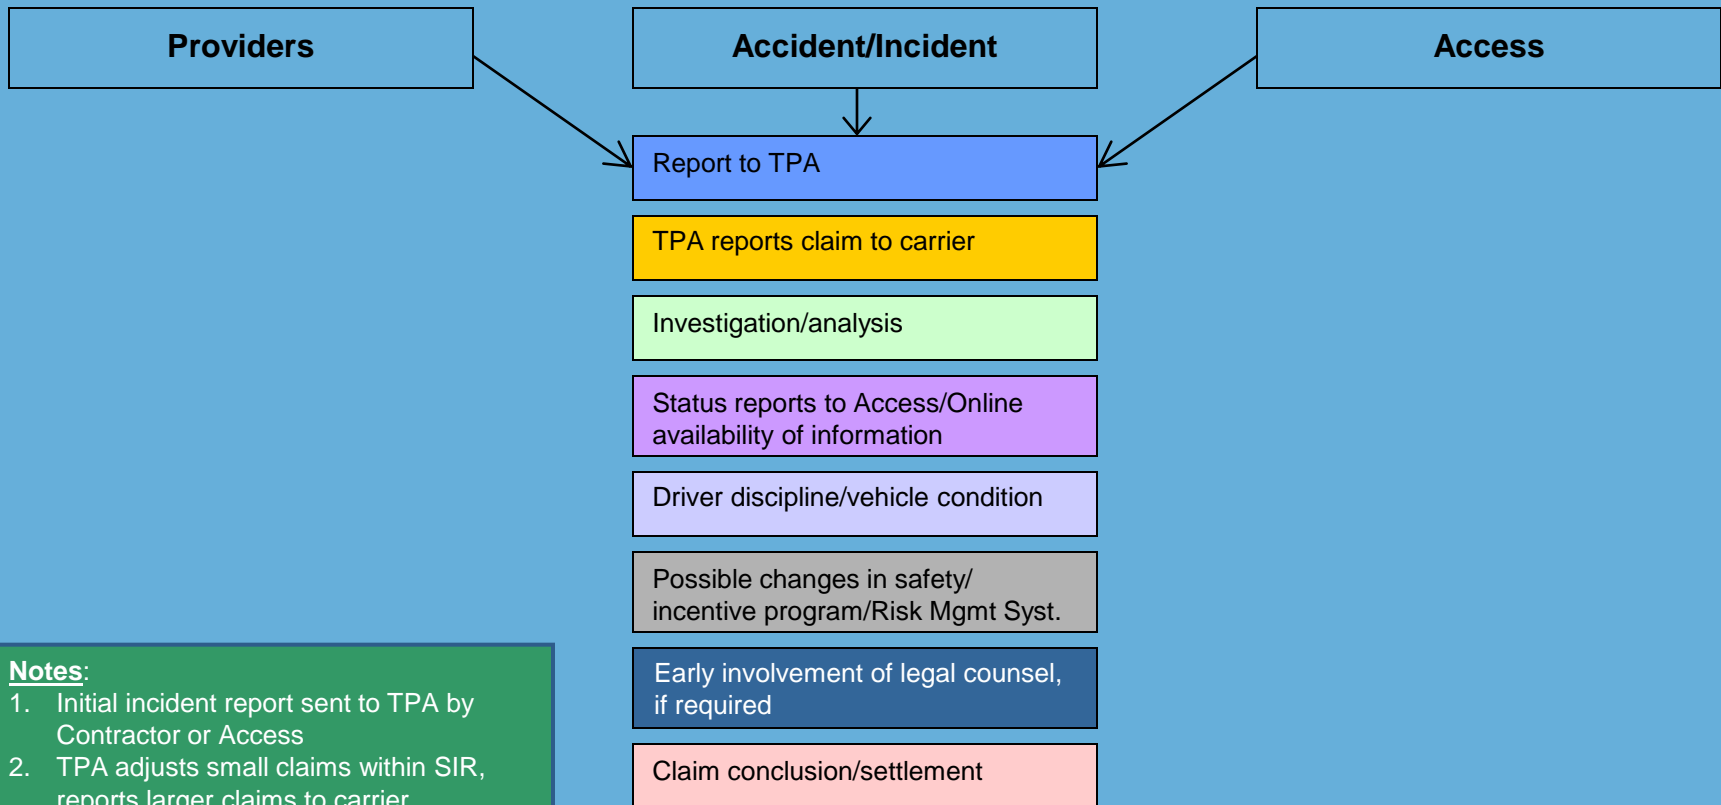

New Structure

Excess Coverage \$15,000,000 excess of \$10,000,000 Excess of \$1,000,000 Primary
Excess Coverage \$5,000,000 excess of \$5,000,000 Excess of \$1,000,000 Primary
Excess Coverage \$5,000,000 excess of \$1,000,000 Primary
Primary Liability Coverage \$1,000,000 limit excess of SIR Covers all Access-owned vehicles
Self-Insured Retention (SIR) (\$50,000 or \$100,000)

Notes:

1. Access is first named insured on all policies with Contractors listed as additional insureds.
2. Third Party Administrator (TPA) hired and paid by Access to handle and settle claims within the SIR.
3. Coverage includes contingent tax liability excess of \$1,000,000.
4. Total program limits are \$26,000,000 excess of SIR.

Claim reporting under new structure

Notes:

1. Initial incident report sent to TPA by Contractor or Access
2. TPA adjusts small claims within SIR, reports larger claims to carrier
3. Contractor can access on-line claim system, if desired
4. Different security levels of access available for on-line system

TPA Information

- TPA works for, is paid by, and is responsive to Access.
- TPA adjusts all claims within the Self-insured Retention (SIR). TPA ensures that legitimate claims from riders are settled quickly and fairly.
- TPA reports claims which may exceed the SIR to Access' carriers, and acts as Access' representative with the carriers.
- Transparency of communication. Detailed claim information is always available on-line 24/7.

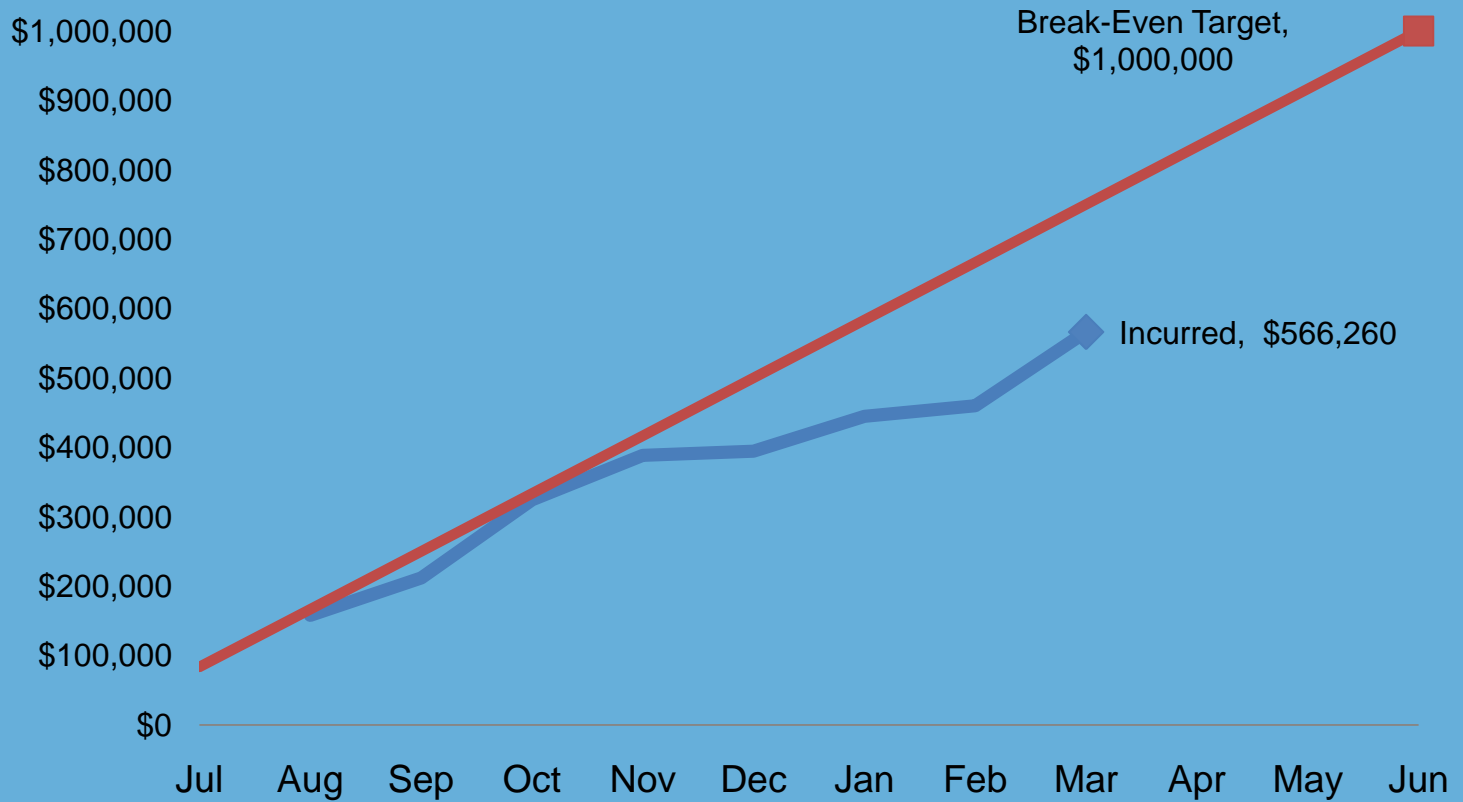

Benefits of New System

- One insurance program covering Access and the Providers together.
- High limits of protection against possible catastrophes.
- Consistent claim handling managed by a TPA hired by Access.
- Opportunity to learn from claims and to make improvements and changes in the overall safety culture of Access, thereby increasing rider satisfaction.
- Changes will reduce claims, making future premiums less.
- Changes will improve safety to benefit riders.
