

Handling cash in the 21st Century

Bob Jacomet

Program Manager

G&D America, Inc.

Sterling, VA

2012 FARE COLLECTION WORKSHOP

Processing Cash in a challenging environment

- Cash is with us to stay
- Cash is a messy business
- What some T-A's are doing
- Other ideas

Cash and a ‘Cashless Society’

- Current economic situation
 - Less credit available
 - More payment instruments available
- The ‘Unbanked’
 - Use more cash – almost exclusively
 - More likely to be using public transit

Issues in processing cash

- Currency presented is a ‘dog’s breakfast’
- Route/Bus delineation is impossible
- Defalcation by Transit Employees
- No internal recirculation (where applicable)

What's going on out there?

- Most currency is prepared by hand for processing
- Currency is sorted and strapped
- Coin is well, coin
- Balancing receipts against cash

Summation

- So, handling cash in the 21st century isn't much different...
- But could it be???
