The OPUS Card

OPUS is a smart card for STM transit fares. But OPUS is also used by a community of Transit Authorities throughout the Greater Montréal area and Québec City area. OPUS is more than just a card. It’s a continuously evolving project amongst 18 transits.

The OPUS Card: a better way to serve transit users

Transit users appreciate the integration of OPUS with other transit networks of neighbouring cities of Montreal. They also appreciate the speed at which users can buy or validate fares. While transit authorities appreciate many aspects of the OPUS e-ticketing system (including avoidance of fraud). OPUS is a lot more than a card and a 200 M$ project!

The OPUS Card: a cross-transit project evolving step by step

The presentation will introduce the objectives of the OPUS e-ticketing system, its governance principles, its step by step implementation, main KPIs and an overview of its strategic planning.
