@andykosinski

Why it Matters

What we did

What you can do

Why it matters

Bike/bus interactions ...on the rise

People on bicycles // bus operators
dissimilar perceptions of each other

What we did

Existing design guidance

15 study corridors

Standard bike lanes

Buffered bike lanes

Separated bikeway

Shared bike-bus lane (SBBL)

RESEDA BLVD

VAN NUYS BLVD

SAN FERNANDO VALLEY

PASADENA

SAN GABRIEL VALLEY

HOLLYWOOD

LA

COLORADO BLVD

ROSEMEAD BLVD

SUNSET BLVD

WILSHIRE BLVD

LOS ANGELES ST

VENICE BLVD

7TH ST

FIGUEROA ST

SOUTH LOS ANGELES

SANTA MONICA

MAIN ST

SAN PEDRO ST

LONG BEACH

BROADWAY

ALAMITOS AVE

PACIFIC AVE

Some serious number crunching

Volumes

Ridership

Behavior

Bus Ops

Bicycle
Traffic Stress

Collisions

Listening to users

What you can do

What works

1. Sharing can be done safely
2. Look for small wins
3. Add a bike facility
4. Use green “skip-stripe” markings

What doesn't work

1. Unusual/confusing designs
2. Unclear signage on permissions
3. Narrow shared bus/bike lanes
4. Intermittent designs

Influence the design process

- ☑ Invite operators to weigh in on designs
- ☑ City should give “heads-up” before implementing
- ☑ Operators have channels for giving feedback

Design Recommendations

Provide space for bus to clear bikeway

1.

Construct bus boarding islands at busy stops

2.

Stripe conflict area at stops

Stripe conflict area at stops

Identify and reduce intersection conflicts

Identify and reduce intersection conflicts

Provide clear sight lines on separated bikeways

5.

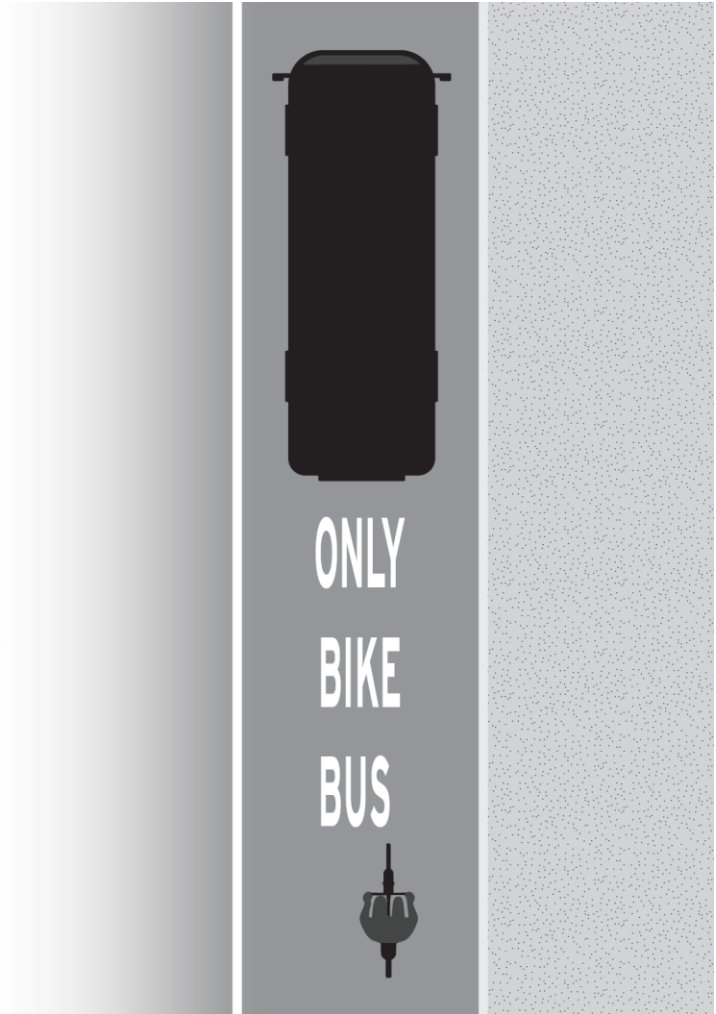

Guide riders through intersections

6.

Clearly sign and stripe shared bus-bike lanes

Use left-sided bikeways on one-way streets

8.

Use left-sided bikeways on one-way streets

Training Recommendations

Does your training address bike/bus?

1) Improve specificity on bike-bus interactions

Does your training address bike/bus?

- 1) Improve specificity on bike-bus interactions
- 2) Help operators understand the perspectives of riding bikes in traffic

Does your training address bike/bus?

- 1) Improve specificity on bike-bus interactions
- 2) Help operators understand the perspectives of riding bikes in traffic
- 3) Provide mechanisms for peer-sharing about changing road infrastructure and bike-bus interaction

Improving the bike/bus interface
...a win/win!
