CISA SERVICES

CISA offers a range of assessments that evaluate operational resilience, cybersecurity practices, organizational management of external dependencies, and other elements of a robust cybersecurity framework. CISA’s cybersecurity assessment services are offered solely on a voluntary basis and are available upon request.

OBJECTIVES

- Reduce Stakeholder Risk
- Enable Data-Driven Decisions
- Influence Operational Behaviors
- Increase National Resilience

Contact your CISA Regional Office for more information:

Service Offerings

- **Vulnerability Scanning** is the persistent scanning of internet-accessible systems for vulnerabilities, configuration errors, and suboptimal security practices
- **Phishing Campaign Assessments** measure propensity to click on email phishing lures
- **Remote Penetration Testing** assess a stakeholder’s internet exposure
- **Risk and Vulnerability Assessments** combine national threat information with data collected and vulnerabilities identified through on-site assessment activities to provide tailored risk analysis reports
- **Red Team Assessments** closely mirror an attack by an advanced adversary to test operational capabilities and maturity
- **Validated Architecture Design Review** evaluate the resiliency of a stakeholder’s system’s networks and security services
- **Third-Party Qualification** empowers outside organizations to perform assessments and technical services following CISA standards, processes, and procedures
- **Critical Product Evaluations** assess, within an isolated environment, the “out-of-the-box” security of products and solutions relevant to critical infrastructure operations and national resilience
