## ORGANIZATION

The APTA Public Transportation Infrastructure Database is a biannual statistical report of major infrastructure data on public transportation systems across the U.S. and Canada. The data is entirely reported by 196 participating APTA transit members in this year's report. Data in this report are as of September 1, 2010, but include additional data that became known prior to publication date. In addition to U.S. transit agencies, data are listed for a few larger Canadian transit agencies at the end of each table or table section.

Only those transit agencies that responded this year are included. Agencies that did not respond to the current year's survey are not included. The totals listed are the sum of reporting agencies only, and NOT the national totals.

Data are for infrastructure USED by the agency, since some transit agencies do not actually own some of their facilities.

There are 3 sections to this report:

1. **Stations and Stops:** Includes transit agencies operating or contracting for bus, trolleybus, ferry, and rail transit service.
2. **Rail Lines:** Includes transit agencies that operate or contract for rail transit service.

In this section, the type-of-line mileage (elevated, surface, and underground) and the number-of-tracks mileage (single, double, triple, quadruple, quintuple, and sextuple) totals are identical--these totals are main line route (not track) mileage normally used for passenger service.

The actual track mileage for those lines is included in the "Mainline passenger track" category, which is the sum of single-track mileage plus 2 times double-track plus 3 times triple-track plus 4 times quadruple track plus 5 times quintuple-track plus 6 times sextuple-track mileage. Track for yards, sidings, storage, and infrequent special-event service are included in the "Yard and other track" category.

3. **Rail Line Segments Status:** Includes both transit agencies that operate or contract for rail transit service and those that are planning future rail lines.

Data include lines in operation as of September 1, 2010, plus those under construction, in design, in planning, and proposed. Only officially-adopted government and private sector projects and those qualified for ballot referendum via citizen initiatives are included. Proposals by citizens and interest groups with no official approval are NOT included. Lines and segments are listed by primary transit agency user, potential user, or agency in charge of the project, regardless of who owns, proposes, plans, designs, or constructs the line or segment.

## Double-Counting of Data

### Station, Stop, and Parking Facility Data

Transit agencies in some cities have more than one rail mode, which share some stations and parking facilities. Since there is no feasible way to allocate such shared-facility data by mode, data were collected for 3 categories--all rail modes combined, bus and trolleybus modes combined, and ferryboat mode--to minimize the double-counting problem. Any facility used by a rail mode is counted in the rail category whether or not bus service is available; any facility used by ferryboat mode is counted in the ferry category whether or not bus service is available. Thus, the bus/trolleybus category includes facilities used ONLY by buses and/or trolleybuses. This eliminates double-counting for an individual agency. However, most of the 30 largest urbanized areas are served by anywhere from 2 to over 20 transit agencies. This results in double-counting when they share the same stations, bus stops, and parking facilities.

## Rail Line Data

Because different rail modes of the same transit agency almost never share the same track (the only known case is in Cleveland), there is almost no double-counting within the same agency. However, there is some double-counting in a few cases (in Connecticut, Illinois, and Pennsylvania) where two different transit agencies share the same tracks.

## Rail Line Segments Status Data

Double-counting occurs when one or more lines share the same track segment. If there are no shared-track segments, the mileage reported for open segments equals the sum of the elevated, surface, and underground mileage reported in the Rail Lines data section.

# Data Items Included

## Stations and Stops

**Stations, number of**--For bus and trolleybus, includes transit centers, stations on transit malls, and stations on busways. The following categories reflect the number of stations so equipped--not the number of pieces of equipment:

**ADA accessible**--in compliance with the Americans with Disabilities Act (for Canadian systems, this essentially means wheelchairs have an unobstructed path from the station entrance to all platforms via elevators or ramps, that equipment and amenities are accessible (fare vending machines, telephones, etc.), and that the vision and hearing-impaired are accommodated (audio and visible signals or announcements and Braille alternatives).

**Attended**--person on duty to answer questions and monitor and/or maintain equipment

**Public address system**--equipment used to make announcements to passengers

**Automated vehicle status displays**--show status of vehicles serving the station

**Informational video displays**--other than vehicle status displays

**Security cameras**

**Concessions**--officially authorized

**Restrooms**--officially designated for passenger use

**Day care facilities**--with official relationship to transit system

**Elevators, Escalators, Faregates/turnstiles, and Fare vending machines**--includes those available for passenger use at stations and associated facilities such as parking garages. Fare vending machines also includes machines located at sales outlets not located at stations.

**Automobile (all-day)**

**Automobile (part-day)**--short-term, kiss-and-ride

**Bicycle**--both lockers and spaces in racks

**Motorcycle/moped**

**Stops, non-station, number of**--total number of non-station stops.

**Shelters**--with passenger shelters.

**Benches**--with passenger benches.

**Lights**--with agency-provided lighting.

**Video Displays**--with video displays, either for automated vehicle status, or other information.

## Rail Lines

**Connecting modes**--at any of the mode's stations. Includes connections for modes such as buses and trolleybuses that have a stop within one block of a station entrance.

A--airline

B--bus

C--commuter rail

F--ferryboat

H--heavy rail

IB--intercity bus (Greyhound, Trailways)

IR--intercity rail (AMTRAK, VIA)

L--light rail

OR--other rail mode such as automated guideway, cable car, inclined plane, monorail, or aerial tramway

T--trolleybus (electric bus operating from overhead wires)

**Lines, number of**--each branch of a multi-branch "line" is a separate line

**Year first line opened**--for passenger service

**Line mileage**--passenger-service route miles to nearest 0.1 mile, counted in one direction only. Mileage is allocated in two ways:

### ***End-to-end mileage by type***

**Elevated**--on structures

**Surface**--includes open cuts and on fill material

**Underground**

### ***End-to-end mileage by trackage***

**Single-track**

**Double-track**

**Triple-track**

**Quadruple-track**

**Quintuple-track**

**Sextuple-track**

**Track Mileage**--to nearest 0.1 mile

**Mainline passenger track**--passenger service is NORMALLY operated. Does NOT include sidings or end-of-line storage tracks, infrequent special-event trackage, adjacent freight tracks that may be used in an emergency, and temporary widenings such as a third track within a station on a double-track line. Mileage is the sum of single-track mileage plus 2 times double-track plus 3 times triple-track plus 4 times quadruple-track plus 5 times quintuple-track plus 6 times sextuple-track mileage.

**Yard and other track**--track not included in "mainline passenger track."

**Grade crossings, number of** (where passenger service is operated)

**Gate protected**

**No gates**

### **Other characteristics**

**Longest passenger platform**--to nearest foot

**Maximum scheduled speed**--in miles per hour

**Shortest scheduled headway**--in minutes and seconds, e.g., 2:30

## Rail Line Segments Status

### Mode

AG--automated guideway

CC--cable car

CR--commuter rail

HR--heavy rail

IP--inclined plane

IR--intermediate rail

LR--light rail (includes street cars)

MG--magnetic levitation

MO--monorail

**Line**--a rail transit line that connects or will connect two locations. Lines with more than one segment in different status levels (e.g., part open and part under construction) have separate entries for each status level.

**Segment Termini**--names of the stations at the line's geographical end points, or if a line does not have stations or station names are not yet determined, the nearest street intersection or other landmark.

**Miles**--the one-way length of the line to the nearest 0.1 statute mile, or if the alignment is not yet final, the mileage figure being used for planning purposes.

**Will open**--"open" if already open, or the earliest possible year the line could open.

### Status

**Proposed**--feasibility study authorized by a governmental unit, adopted as a future project (e.g., listed in 10-year improvement plan), or qualified for a ballot referendum via a citizen initiative, but not yet in planning status.

**Planning**--alternatives analysis, environmental impact study, route alignment selection, or other planning activity underway.

**Design**--engineering design underway.

**Construction**--construction underway.

**Open**--in operation.

# TABLE 1: PARTICIPATING TRANSIT AGENCIES

# - Data from Previous Survey

State	City	Agency Name
<b>UNITED STATES</b>		
<b>BUS</b>		
AR	Little Rock	Central Arkansas Transit Authority
AZ	Avondale	# City of Avondale
AZ	Chandler	# City of Chandler
AZ	Mesa	# City of Mesa
AZ	Phoenix	# City of Phoenix Public Transit Department
AZ	Phoenix	# Maricopa County - Human Services Dept.
AZ	Scottsdale	City of Scottsdale
AZ	Tempe	City of Tempe, Arizona
AZ	Tucson	City of Tucson
CA	Alturas	# Modoc Transportation Agency
CA	Antioch	Eastern Contra Costa Transit Authority
CA	Bakersfield	# Golden Empire Transit District
CA	Culver City	Culver City Municipal Bus Lines
CA	Davis	Unitrans
CA	Delano	Delano Area Rapid Transit
CA	Fresno	Fresno Area Express
CA	Livermore	Livermore/Amador Valley Transit Authority
CA	Long Beach	Long Beach Transit
CA	Los Angeles	Los Angeles County Metropolitan Transportation Authority
CA	Montebello	# Montebello Bus Lines
CA	Monterey	# Monterey-Salinas Transit
CA	Norwalk	City of Norwalk Transit System
CA	Oakland	Alameda-Contra Costa Transit District
CA	Oceanside	North San Diego County Transit District
CA	Orange	Orange County Transportation Authority
CA	Oxnard	Gold Coast Transit

<b>State</b>	<b>City</b>	<b>Agency Name</b>
CA	Redding	Redding Area Bus Authority
CA	Redondo Beach	City of Redondo Beach
CA	Rio Vista	City of Rio Vista
CA	Riverside	Riverside Transit Agency
CA	San Bernardino	Omnitrans
CA	San Carlos	San Mateo County Transit District
CA	San Diego	San Diego Metropolitan Transit System
CA	San Francisco	Golden Gate Bridge, Highway and Transportation District
CA	San Francisco	San Francisco Municipal Railway
CA	San Jose	Santa Clara Valley Transportation Authority

## Table 2: Summary Table: Number of Attended and ADA Accessible Stations by Mode

**Attended Station:** A station with a non-police staff person on duty at least part of the day to do things such as answer questions, monitor and/or maintain equipment, make announcements, and sell fare media.

**ADA Accessible Station:** A station in compliance with the Americans with Disabilities Act. This basically means wheelchairs have an unobstructed path from the station entrance to all platforms via elevators or ramps, that equipment and amenities are accessible (platform lifts, fare vending machines, telephones, etc.), and that the vision and hearing-impaired are accommodated (audio and visible signals or announcements and braille alternatives).

**Canadian systems are not subject to a particular national accessibility standard such as the ADA and as such use their own standards for accessibility.**

Note: Summary tables include data from 2010 survey ONLY

Mode	Country	Stations	Number of Attended Stations	Attended Stations % of Total	Number of ADA Accessible Stations	ADA Accessible Stations % of Total
BUS	UNITED STATES	977	206	21.08%	937	95.91%
FERRY	UNITED STATES	55	33	60.00%	52	94.55%
RAIL	UNITED STATES	2666	1029	38.60%	1810	67.89%
BUS	CANADA	90	18	20.00%	17	18.89%
FERRY	CANADA	2	2	100.00%	2	100.00%
RAIL	CANADA	203	79	38.92%	89	43.84%

### Table 3: Summary Table: Number of Stations with Informational Systems by Mode

**Station with Public Address System:** A station with equipment used to make announcements to passengers--either from a station attendant or from a central control facility.

**Station with Automated Vehicle Status Displays:** A station with electronic video display equipment that automatically provides information on the status of vehicles on routes serving that station.

**Station with Informational Video Displays:** A station with electronic video display equipment that provides information other than vehicle status, such as advertising, news, or public service messages. It may also provide vehicle status information.

**Station with Security Cameras:** A station with cameras to monitor the station, bus transfer area, and/or parking facility to provide information to station and security personnel.

Note: Summary tables include data from 2010 survey ONLY

Mode	Country	Stations	Stations with Public Address System	Public Address System % of Total	Stations with Vehicle Status Displays	Vehicle Status Displays % of Total	Stations with Informational Video Displays	Informational Video Displays % of Total	Stations with Security Cameras	Security Cameras % of Total
BUS	UNITED STATES	977	130	13.31%	149	15.25%	80	8.19%	345	35.31%
FERRY	UNITED STATES	55	25	45.45%	0	0.00%	1	1.82%	29	52.73%
RAIL	UNITED STATES	2666	1999	74.98%	791	29.67%	854	32.03%	1176	44.11%
BUS	CANADA	90	12	13.33%	21	23.33%	0	0.00%	36	40.00%
FERRY	CANADA	2	2	100.00%	2	100.00%	0	0.00%	2	100.00%
RAIL	CANADA	203	198	97.54%	44	21.67%	57	28.08%	203	100.00%

## Table 4: Summary Table: Stations with Concessions, Restrooms, and Day Care Facilities by Mode

**Station with Concessions:** A station with OFFICIALLY AUTHORIZED concessions such as a newstand or newspaper boxes, food stand or food vending machines, convenience store, dry cleaner, ATM machine, or musician performing with a permit. Does NOT include such services in nearby locations such as those on the ground floor of an adjacent office building that are off the station property and not officially authorized.

**Station with Restrooms:** A station with restrooms officially designated for passenger use. Does not include stations with private restrooms available only to transit staff.

**Station with Day Care Facilities:** A station with a day care facility with OFFICIAL RELATIONSHIP to the transit system. Does NOT include such services in nearby locations such as those in an adjacent office building that are off the station property and not officially authorized.

Note: Summary tables include data from 2010 survey ONLY

Mode	Country	Stations	Stations with Concessions	Concessions % of Total	Stations with Restrooms	Restrooms % of Total	Stations with Day Care Facilities	Daycare % of Total

## Table 5: Summary Table: Escalators, Elevators, Fare Gates, and Fare Vending Machines by Mode

**Escalator:** A moving stairway that moves up and down at an angle to transfer passengers from one level of a station or parking facility to another. Does not include non-passenger escalators used only for freight or by transit staff.

**Elevator:** A compartment that usually moves up and down vertically to transfer passengers from one level of a station or parking facility to another. Elevators may move horizontally, such as from a station platform to an adjacent parking garage, but such movement is normally done by non-elevator means such as a pedestrian bridge or a moving sidewalk. Does not include non-passenger elevators used only for freight or by transit staff.

**Faregate/turnstile:** A pedestrian gate or barrier through which passengers must pass to enter and/or exit a station or parking facility. Fares are almost always collected or recorded upon entry, but much less often on exit.

**Fare vending machine:** A machine normally located at a station, an associated parking facility, or on a transit mall that sells transit fare payment media. Some machines may be located off transit property at locations such as shopping malls, governmental centers, and convenience stores for the convenience of passengers.

Note: Summary tables include data from 2010 survey ONLY

Mode	Country	Stations	Number of Elevators	Number of Escalators	Number of Fare Gates	Number of Fare Vending Machines

## Table 6: Summary Table: Number of Parking Spaces by Mode

**Automobile all-day parking space:** A space in parking facilities or on nearby streets reserved or intended for transit passenger automobiles and other personal vehicles that is available for a full normal work day--normally 10 hours or more.

**Automobile part-day parking space:** A space in parking facilities or on nearby streets reserved or intended for transit passenger automobiles and other personal vehicles that is available for less than a normal work day--such as 9:00 am to 3:00 pm mid-day parking or 30-minute kiss-and-ride parking.

**Bicycle parking space:** A small space in parking facilities or on nearby streets or sidewalks reserved or intended for transit passenger bicycles. The total is the sum of the number of slots in bicycle racks (not the number of racks) and the capacity of all bicycle lockers (one bicycle per locker is assumed unless capacity was reported as two bicycles).

**Motorcycle/moped parking space:** A small space about 3 feet wide and 6 feet long in parking facilities or on nearby streets reserved or intended for transit passenger motorcycles, mopeds, and motor scooters.

Note: Summary tables include data from 2010 survey ONLY

Mode	Country	Stations	Number of All-Day Spaces	Number of Part-Day Spaces	Number of Bicycle Spaces	Number of Motorcycle Spaces

RAIL	CANADA	203	32875	343	1781	0

## Table 7: Summary Table: Non-Station Stops by Mode

**Stop with shelter:** A stop that has a passenger shelter.

**Stop with bench:** A stop that has a passenger bench.

**Stop with lighting:** A stop that has lighting provided for passengers.

**Stop with video display:** A stop that has a video display, either for automated vehicle status, or other information.

Note: Summary tables include data from 2010 survey ONLY

Mode	Country	Stops	% of Stops with Shelters	% of Stops with Benches	% of Stops with Lighting	% of Stops with Video Displays

## TABLE 8: NUMBER OF STATIONS

**Station: A passenger boarding/deboarding facility with a platform, a plaza flanked by several bus bays, or a dock. Some stations have elevators, escalators, faregates or turnstiles, a building with a waiting room, ticket office or machines, restrooms, or concessions. Others only have an open-air area with a canopy and/or with a wind shelter. All underground, elevated, rail (except for some cable car and light rail locations), ferryboat, transportation or transit center, and busway locations are stations. Those park-and-ride facilities and transit malls having such infrastructure are also stations; those that don't are stops.**

**TABLE 9: NUMBER OF ADA ACCESSIBLE AND ATTENDED STATIONS**

**Attended Station:** A station with a non-police staff person on duty at least part of the day to do things such as answer questions, monitor and/or maintain equipment, make announcements, and sell fare media.

**ADA Accessible Station:** A station in compliance with the Americans with Disabilities Act. This basically means wheelchairs have an unobstructed path from the station entrance to all platforms via elevators or ramps, that equipment and amenities are accessible (platform lifts, fare vending machines, telephones, etc.), and that the vision and hearing-impaired are accommodated (audio and visible signals or announcements and braille alternatives).

- Systems with less than 100% of stations being ADA accessible are not necessarily out of compliance.

- Canadian systems are not subject to a particular national accessibility standard such as the ADA and as such use their own standards for accessibility.

# - Data from Previous Survey

**TABLE 10: NUMBER OF STATIONS WITH PUBLIC ADDRESS SYSTEMS, VEHICLE STATUS DISPLAYS, AND INFORMATIONAL VIDEO DISPLAYS**

*Station with Public Address System: A station with equipment used to make announcements to passengers--either from a station attendant or from a central control facility.*

*Station with Automated Vehicle Status Displays: A station with electronic video display equipment that automatically provides information on the status of vehicles on routes serving that station.*

*Station with Informational Video Displays: A station with electronic video display equipment that provides information other than vehicle status, such as advertising, news, or public service messages. It may also provide vehicle status information.*

**TABLE 12: NUMBER OF STATIONS WITH CONCESSIONS, RESTROOMS, OR DAYCARE**

**Station with Concessions:** A station with OFFICIALLY AUTHORIZED concessions such as a newstand or newspaper boxes, food stand or food vending machines, convenience store, dry cleaner, ATM machine, or musician performing with a permit. Does NOT include such services in nearby locations such as those on the ground floor of an adjacent office building that are off the station property and not officially authorized.

**Station with Restrooms:** A station with restrooms officially designated for passenger use. Does not include stations with private restrooms available only to transit staff.

**Station with Day Care Facilities:** A station with a day care facility with OFFICIAL RELATIONSHIP to the transit system. Does NOT include such services in nearby locations such as those in an adjacent office building that are off the station property and not officially authorized.

**TABLE 13: NUMBER OF ESCALATORS, ELEVATORS, FAREGATES, AND FARE VENDING MACHINES IN STATIONS AND PARKING FACILITIES**

**Escalator:** A moving stairway that moves up and down at an angle to transfer passengers from one level of a station or parking facility to another. Does not include non-passenger escalators used only for freight or by transit staff.

**Elevator:** A compartment that usually moves up and down vertically to transfer passengers from one level of a station or parking facility to another. Elevators may move horizontally, such as from a station platform to an adjacent parking garage, but such movement is normally done by non-elevator means such as a pedestrian bridge or a moving sidewalk. Does not include non-passenger elevators used only for freight or by transit staff.

**Faregate/turnstile:** A pedestrian gate or barrier through which passengers must pass to enter and/or exit a station or parking facility. Fares are almost always collected or recorded upon entry, but much less often on exit.

**Fare vending machine:** A machine normally located at a station, an associated parking facility, or on a transit mall that sells transit fare payment media. Some machines may be located off transit property at locations such as shopping malls, governmental centers, and convenience stores for the convenience of passengers.

**TABLE 14: NUMBER OF PARKING SPACES**

**Automobile all-day parking space:** A space in parking facilities or on nearby streets reserved or intended for transit passenger automobiles and other personal vehicles that is available for a full normal work day--normally 10 hours or more.

**Automobile part-day parking space:** A space in parking facilities or on nearby streets reserved or intended for transit passenger automobiles and other personal vehicles that is available for less than a normal work day--such as 9:00 am to 3:00 pm mid-day parking or 30-minute kiss-and-ride parking.

**Bicycle parking space:** A small space in parking facilities or on nearby streets or sidewalks reserved or intended for transit passenger bicycles. The total is the sum of the number of slots in bicycle racks (not the number of racks) and the capacity of all bicycle lockers (one bicycle per locker is assumed unless capacity was reported as two bicycles).

**Motorcycle/moped parking space:** A small space about 3 feet wide and 6 feet long in parking facilities or on nearby streets reserved or intended for transit passenger motorcycles, mopeds, and motor scooters.

## Table 16: Summary Table: Line Mileage by Number of Tracks by Mode

**Single-track mileage:** The total length of all lines (NOT tracks) in passenger service that are operated on one track, counting mileage in one direction only, to the nearest 0.1 mile.

**Double-track mileage:** The total length of all lines (NOT tracks) in passenger service that are operated on two parallel tracks, counting mileage in one direction only, to the nearest 0.1 mile.

**Triple-track mileage:** The total length of all lines (NOT tracks) in passenger service that are operated on three parallel tracks, counting mileage in one direction only, to the nearest 0.1 mile.

**Quadruple-track mileage:** The total length of all lines (NOT tracks) in passenger service that are operated on four parallel tracks, counting mileage in one direction only, to the nearest 0.1 mile.

**Quintuple-track mileage:** The total length of all lines (NOT tracks) in passenger service that are operated on five parallel tracks, counting mileage in one direction only, to the nearest 0.1 mile.

**Sextuple-track mileage:** The total length of all lines (NOT tracks) in passenger service that are operated on six parallel tracks, counting mileage in one direction only, to the nearest 0.1 mile.

**TABLE 18: RAIL LINES - GENERAL INFORMATION**

*Connecting mode: A public transportation mode that connects to a transit rail line at any of the mode's stations. Because of one-way street patterns, buses and trolleybuses that have a stop within one block of a station entrance are considered a connection. Airlines are only listed as a connection when the rail line directly serves the airport terminal and does not require passengers to transfer to shuttle buses. Modes are identified by the following codes: A--airline, B--bus, C--commuter rail, F--ferryboat, H--heavy rail, IB--intercity bus (e.g., Greyhound, Trailways), IR--intercity rail (e.g., AMTRAK, VIA), L--light rail, T--trolleybus (electric bus operating from overhead wires), OR--other rail mode (automated guideway, cable car, inclined plane, monorail, or aerial tramway).*

*Line: A route on which transit passenger service is operated. Each branch of a multi-branch "line" is counted as a separate line.*

*Year first line opened: The year the first line was opened for passenger service.*

**TABLE 21: NUMBER OF TRACK MILES**

**Mainline passenger track--** The total length of ALL tracks on which passenger service is NORMALLY operated, to the nearest 0.1 mile. It does NOT include sidings, end-of-line or other storage tracks, adjacent freight tracks that may be used in an emergency, and temporary widenings such as a third track within a station on a double-track line.

**Yard and other track:** The total length of ALL track not included in "mainline passenger track," to the nearest 0.1 mile.

## Table 24: Summary Table: New Rail Routes and Segments by Status by Mode

**Construction--construction underway.**

**Design--engineering design underway.**

**Planning--alternatives analysis, environmental impact study, route alignment selection, or other planning activity underway.**

**Proposed--feasibility study authorized by a governmental unit, adopted as a future project (e.g., listed in 10-year improvement plan), or qualified for a ballot referendum via a citizen initiative, but not yet in planning status.**

Note: Summary tables include data from 2010 survey ONLY
