Appendix C: Facility scorecards

Appendix D: Inventory of 5311 vehicles

Appendix E: NTD-assigned numbers for all 5311 agencies

Public outreach efforts

The TAM Plan, process, process updates, and final draft were all available for public review and comment. They were distributed via webinar, conference call, PowerPoint slides, email distribution lists to our providers and the Federal Transit Administration Region VII office, and the final draft placed on our website. No comments were received.

Background

In 2012, MAP-21 mandated FTA to develop a rule establishing a strategic and systematic process of operating, maintaining, and improving public capital assets effectively through their entire life cycle. The TAM Final Rule 49 USC 625 became effective Oct. 1, 2016 and established four performance measures. The performance management requirements outlined in 49 USC 625 Subpart D are a minimum standard for transit operators. In accordance with 49 U.S.C. § 5335, agencies are required to calculate and report new data elements to the National Transit Database (NTD).

New and updated regulations require transit agencies reporting to the NTD to include condition information on assets reported to the database. To satisfy this new requirement, the condition of each vehicle and facility supporting transit operations must be reported to the NTD.

The TAM rule established performance measures to be reported to the NTD Asset Inventory Module (AIM) at 49 CFR part 625. In addition to AIM reporting, the TAM rule requires asset inventory and asset condition assessments at a level of detail sufficient to monitor and predict the performance of assets and to inform investment prioritization in the TAM Plan. Facility condition assessments must be conducted by assessing the condition of and assigning a rating for facility assets using FTA's Transit Economic Requirements Model (TERM) scale.

Information on facility conditions is intended to supplement other facility-related information entered in the NTD AIM.

NOTE: The category of INFRASTRUCTURE is also a component of TAM planning, but does not apply to the State of Kansas, as we do not have any passenger rail in operation in our state.

NOTE: As there are no agencies in the KDOT Group Plan that exceed the thresholds of Tier II providers, the Group Plan only covers the reporting required for Tier II agencies. Tier II agencies include:

- *subrecipients of 5311 funds*
- *American Indian Tribes*
- *less than 100 vehicles in fixed route modes*
- *less than 100 vehicles in one non-fixed route mode*

Asset management

For many organizations, asset management is a new way of planning for the future of their business. Successful asset management tracks an asset throughout its entire useful life until replacement or disposal. KDOT hopes to incorporate asset management into the existing project selection matrix to allocate available funding to plans, projects, and purchases in a manner that both prioritizes the needs of our state as well as ensures we are being good stewards of taxpayer dollars.

At its core, transit asset management (TAM) is a data-driven process. We will be using both existing and new datasets to track spending against many indicators, such as asset age, condition, and useful life. The resulting analysis will not only help us better manage our Program, but also build a data source that can assist planning agencies and local governments in making the best possible decisions in support of policies and funding related to public transportation.

KDOT Group Plan

The majority of agencies in Kansas receiving 5307, 5310, and/or 5311 funds have accepted KDOT's targets as submitted to FTA and decided to participate in the KDOT Group Plan (Group Plan). The Group Plan is designed to reduce the planning and reporting burden on smaller transit agencies from having to develop individual plans and report to FTA's National Transit Database (NTD) on their own. They have agreed to be covered under the Group Plan, which will be analyzed in aggregate.

There are two transit agencies that have written their own plans (Kansas City Area Transit Agency and Wichita Transit). KDOT will reference their targets and data in this document, however those respective agencies are wholly responsible to FTA in submitting their TAM data and analysis to FTA via the National Transit Database

FOUR REQUIRED ELEMENTS OF A TAM PLAN

Asset inventory: A register, repository, or comprehensive list of an agency's assets and specific information about those assets.

Condition Assessment: The process of assessing and documenting the condition of residual life of an asset.

Decision Support Tools: An analytic process or methodology to: (1) help prioritize projects and maintain the state of good repair of capital assets within a public transportation system, based on available condition data and objective criteria; or, (2) assess financial needs for asset investments over time.

Investment Prioritization: A transit provider's ranking of capital projects or programs to achieve or maintain a state of good repair based on financial resources from all sources that a transit provider reasonably anticipates will be available over the TAM plan horizon.

(source: FTA)

(NTD) and updating their targets and documents as prescribed by FTA.

Additionally, each MPO in Kansas was sent the State of Good Repair chart and Useful Life Benchmarks that KDOT adopted on January 1, 2017. Most MPOs accepted KDOT's SGRs and ULBs as presented. Two MPOs (Mid America Regional Council in the Kansas City metro and Wichita Area Metropolitan Planning Organization in the Wichita metro) chose to set their own SGRs and ULBs. Those MPOs are responsible for tracking their annual data, analyzing the results, and reporting those results to KDOT and the transit providers in their respective planning areas.

Please note that Section 5310-funded agencies *that do not also provide general public transportation* are not required, but are encouraged, to participate in TAM Plan efforts at this time. For example, senior centers that receive 5310 funding or other client-based services are not subject to the TAM rule at this time. Participation requirements may change in future years, and the Group Plan will be updated accordingly.

[**Frequency**](#)

KDOT, along with any agency that chooses not to use the KDOT Group Plan, must report data annually and review the document, data, implementation strategies, budget, goals, and outcomes at least every 4 years. Revisions to TAM Plans can be done between required updates but must be accepted by FTA and incorporated into the TIP (if in an MPO area) or STIP (all other areas) before they become official.

[**Outreach**](#)

An invitation to participate in the Group Plan was extended to all public transit and paratransit agencies as well as all of the MPOs in Kansas. A conference call/PowerPoint presentation was given at KDOT headquarters in March, 2017 outlining the components of the TAM Plan, the process that would be followed, and the offer for all agencies in the TAM Plan process to participate under the Group Plan. KDOT has engaged the public transit providers in Kansas via email, conference call, presentations, and review & comment periods as the Group Plan developed. Consensus was developed as to the general philosophy, policies, and roles and responsibilities that both KDOT and each transit agency would follow.

While all agencies agreed with the overarching intent of the TAM Plan process, those agencies that opted-out of the Group Plan will be responsible for their own respective individual plans, target setting, and reporting requirements.

Participants

KDOT, as Group Plan Sponsor, will be responsible for reporting data and target updates annually to the NTD as well as updating the Group Plan at least every four years.

KDOT has offered every transit agency in Kansas to participate in the Group Plan; almost all have agreed.

Data will be collected in a variety of formats, including NTD data, Black Cat user profiles and inventories, surveys with Group Plan participants, and in-person or webinar-format discussions.

The Group Plan Sponsor is responsible for deciding on, developing, and communicating the following components of the TAM Plan process:

- Eligibility for participation in the Group Plan
- Plans, timeline, and deadlines for TAM Plan development
- Data needs and formats from agencies
- Procedures for having policy discussions
- Plans for setting targets and having policy discussions
- Thresholds for amending the TAM Plan
- Thresholds for a TAM Plan update
- Coordination with planning organizations, and
- Expectations for the process of opting out

Public transportation providers assist the elderly, individuals with disabilities, and the general public in getting to all the places they live, work, learn, play, and heal.

Participants choosing to opt-out of Group TAM Plans must notify KDOT no later than 12 months prior to the next TAM plan due date.

Accountable Executive

Each transit provider must designate an Accountable Executive responsible for approving the Group Plan. This person often serves as the agency's chief executive. Each agency identifies their Accountable Executive, which is not required to be a new position. In some cases, the Accountable Executive may be the same individual that certifies the NTD report.

While the Accountable Executive is ultimately responsible for the agency's participation in the Group Plan, other staff should be involved in the day-to-day development and implementation of the Group Plan. In some agencies, one staff person may be responsible for coordinating all aspects of TAM planning with KDOT. In other agencies, staff from throughout the organization will provide the technical expertise. In small

agencies where resources are limited, the Accountable Executive may also assume the day-to-day responsibilities.

Roles and responsibilities

The following chart outlines the roles and responsibilities for KDOT and Group Plan participants. Continual collaboration throughout the development of the Group Plan will help ensure that all participants are on board with the targets, goals, and objectives.

<i>Element</i>	<i>KDOT</i>	<i>Group Plan participants</i>
Overarching	Write Group Plan	Support Group Plan Accountable Executive approves plan
Asset inventory	Coordinate consolidation Develop/modify database Define data collection elements and formats	Collect asset data Submit data in format required on schedule
Condition Assessment	Define data collection methodology and schedule Manage data Submit final data to NTD	Support/conduct condition assessments
Decision Support Tools	Share guiding policies including weighting or ranking priorities Develop tools Analyze and interpret data	Communicate goals and needs Provide information to support tool
Investment Prioritization	Gather additional data Prioritize projects (iterative steps) Generate ranked list of projects	Share information on all funding sources with KDOT Share existing Capital Investment Plans Coordinate with KDOT
Annual Target Setting	Coordinate target setting with the participating transit providers' Accountable Executives, to the extent practicable Report targets to NTD	
Annual Narrative Report	Develop the Annual Narrative Report Submit Narrative to NTD	
NTD Asset Inventory	For those participants that do not report independently, report basic TAM information, including: agency profile; asset inventory; and facility condition assessment	For those participants that report independently to NTD are responsible for reporting basic TAM information, including: agency profile, asset inventory, and facility condition assessment

Performance Measures

KDOT has established the following core performance measures for use in the analysis of data collected to inform the TAM Plan:

- Rolling Stock: The percentage of revenue vehicles (by type) that exceed the useful life benchmark (ULB).
- Equipment: The percentage of non-revenue service vehicles (by type) that exceed the ULB.
- Facilities: The percentage of facilities (by group) that are rated less than 3.0 on the Transit Economic Requirements Model (TERM) Scale.

As part of the annual report, an agency must submit overall facility condition ratings for each facility in its asset inventory for which it has direct capital responsibility. However, this does not imply that condition data must be collected annually. FTA requires that facility condition data be fully updated every four years, at a minimum, so KDOT will be submitting facility data for all facilities covered in the Group Plan once every four years. Only facilities that are actively used to support revenue service are required to have their condition assessed. As such, facilities under construction are exempt from condition assessment requirements.

Additionally, KDOT will consider the following supporting Performance Measures when developing the ranked investment priorities matrix:

- Age of individual revenue vehicles, by agency
- Mileage of individual revenue vehicles, by agency
- Availability of local match dollars for replacement vehicles, by agency
- Asset replacement plans and policies, by agency

Useful Life Benchmarks

Appendix B illustrates the Useful Life Benchmarks being used for this Group Plan. KDOT considered the standardized FTA ULBs when developing our own ULBs. We believe that our ULBs better reflect the fleet and facilities of operation in Kansas as well as taking into consideration the geography and topology our state enjoys.

We have also listed the ULBs and target percentages of agencies that chose not to participate in our Group Plan, for reference.

Targets (percentages)

As Group Sponsor, KDOT (in coordination with most of the transit service providers in

the rural and small urban areas and the MPOs in the Topeka, Lawrence, Manhattan, KS and St. Joseph, MO regions) has established a set of Targets for the Group Plan. A larger scale version of this chart, along with the targets set by agencies that chose to submit independent TAM Plans, can be found in Appendix A.

TAM Plan targets set as of 01.01.17								
Category	Class	Example	Abbreviation Based on	FTA		KDOT Group Plan		
				FTA Useful Life	ULB	ULB	KDOT Replacement threshold	x% of fleet that is older than the ULB (State of Good Repair - SGR)
Rolling Stock (revenue vehicles)						(includes MPOs in Flint Hills, Topeka, Lawrence, and St. Joe)		
	Over-the-road Bus	<i>Motorcoach</i>	BR	Age	12 years / 500K miles	14	14	14 years / 750K miles
	Full-sized Bus	<i>Gillig</i>	BU	Age	10 years / 350K miles	14	14	12 years / 500K miles
	Cutaway Bus	<i>Ford Cut-away</i>	CU	Age	4 years / 100K miles	10	10	5 years / 100K miles
	Van	<i>Ford Transit</i>	VN	Age	4 years / 100K miles	8	8	5 years / 100K miles
	Minivan	<i>Dodge Caravan</i>	MV	Age	4 years / 100K miles	8	8	5 years / 100K miles
	Automobile	<i>Ford Taurus</i>	AO	Age	4 years / 100K miles	8	8	--
Equipment (non-revenue vehicles)				FTA Useful Life	ULB	ULB	KDOT Replacement threshold	x% of fleet that is older than the ULB (State of Good Repair - SGR)
	Van	<i>Ford Transit</i>	VN	Age	4 years / 100K miles	8	8	5 years / 100K miles
	Minivan	<i>Dodge Caravan</i>	MV	Age	4 years / 100K miles	8	8	5 years / 100K miles
	SUV	<i>Ford Explorer</i>	SV	Age	4 years / 100K miles	8	8	5 years / 100K miles
	Automobile	<i>Ford Taurus</i>	AO	Age	4 years / 100K miles	8	8	5 years / 100K miles
	Cutaway Bus	<i>Ford Cut-away</i>	CU	Age	4 years / 100K miles	10	10	--
Facilities (large-scale)				FTA Useful Life	TERM	ULB (TERM)	KDOT Replacement threshold	x% of facilities that scores < 3.0 on the TERM Scale
	Administrative	<i>Agency headquarters</i>	F-ADMIN	Condition	40 years	3.00	3.00	--
	Maintenance	<i>Repair garage</i>	F-MAINT	Condition	40 years	3.00	3.00	--
	Parking	> 500 spaces	F-PARK	Condition	40 years	3.00	3.00	--
	Passenger	<i>Indoor transit hub station</i>	F-PASS	Condition	40 years	3.00	3.00	--

Targets for each asset class have been set and should be read as “not more than x% of our vehicles will have passed the KDOT-developed ULB.” These values are our targets for fleet maintenance and upkeep. These targets may be changed to better align with the needs of our public transportation system in future years’ reporting.

Targets (TERM scores)

Similarly, the facility targets are based on FTA’s TERM scale of asset condition, which is an index of inspections of each system included in the building. The TERM scale runs from 5 (excellent) to 1 (poor). WE contracted the task with external consultants from TranSystems and Groundswell Consulting to ensure a fair and impartial inspection.

Scores for each category will be combined and averaged, and the final result rounded to the nearest whole number. Please refer to the table below for descriptions of the scores; each facility’s completed scorecard can be found in Appendix C.

Rating	Condition	Description
5	Excellent	No visible defects, new or near new condition, may still be

		under warranty if applicable
4	Good	Good condition, but no longer new, may be slightly defective or deteriorated, but is overall functional
3	Adequate	Moderately deteriorated or defective; but has not exceeded useful life
2	Marginal	Defective or deteriorated in need of replacement; exceeded useful life
1	Poor	Critically damaged or in need of immediate repair; well past useful life

The results of those independent facility inspections are as follows:

Agency	Year built	TERM score
DSNWK	2005	5.0
Finney County Transportation	2009	5.0
Flint Hills Area Transportation Agency	2013	4.0
OCCK (admin offices)	1940 – 2017	4.0
OCCK (maintenance building)	1940 – 2017	4.0
Reno County Transportation	2008	4.0
SEK-CAP	2005	4.0

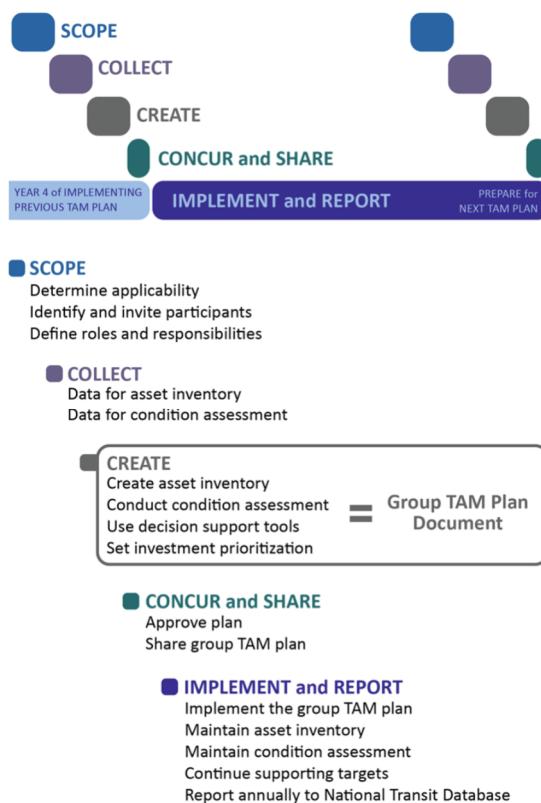

State of Good Repair

Maintaining the quality of our state's public transit and paratransit assets is paramount in ensuring a consistently high state of good repair (SGR.) Ensuring that we are providing reliable, affordable services to our riders, our vehicles are being replaced and new technologies are being introduced in a timely and cost-effective manner, and that we are making allocation decisions that ensure we are being a mindful steward of federal, state, and local funding, our SGR will be a key indicator in making plans and advancing programs in the future.

Timeline

2017 Winter	Group Plan initial targets are submitted to NTD	KDOT
2018 Spring	Draft Group Plan	KDOT
2018 Summer	Accountable Executive identified for each agency	Transit Providers/MPOs
2018 Summer	Inventory of all Program assets is collected	KDOT, with assistance from Transit Providers
2018 Fall	KDOT puts draft Group Plan out for public review and comment period	KDOT
2018 Fall	Group Plan finalized, approved, and published on KDOT website	FTA, KDOT
2018 Fall	Assets and condition reports sent to NTD	KDOT
2018	Review of Group Plan during State Management Review	FTA, KDOT
2018	Review of State Management Plan	FTA, KDOT
2019 Fall	Report on assets in NTD. Submit narrative report on asset condition and prioritization, and define changes since last report with progress notes to reach initial targets.	KDOT

The illustration below illustrates the sequence of activities to be undertaken to develop the Group Plan during each update.

Data to be reported in the Group Plan

- Rolling Stock: The National Transit Database (NTD) lists 23 types of rolling stock. Targets are set for each mode in the overall inventory. We will only track those types of vehicles that are in our 5311 fleets.
- FTA default ULB or Agency customized ULB: Default ULBs represent the probable useful life of an asset based on the TERM scale. The Group Plan will be using a combination of FTA provided ULBs as well as some that are customized to our Program as outlined in our Initial Targets chart.
- Equipment: Only three classes of non-revenue service vehicles are collected and used for target setting: 1) automobiles, 2) other rubber tire vehicles, and 3) other steel wheel vehicles. KDOT will only consider equipment in these categories with a replacement cost of at least \$50,000.
- Facilities: Four types of facilities are reported to NTD. Only two groups are used for target setting 1) Administrative and Maintenance and 2) Passenger and Parking.
- TAM Performance Metrics: The NTD collects current year performance data. The NTD will collect additional Asset Inventory Module (AIM) data to forecast performance measures for the next fiscal year.
- TAM Narrative Report: The TAM Rule requires KDOT to submit this report to the NTD in RY 2018, and then annually thereafter. The report describes conditions in the prior year that led to target attainment status. As Group Plan sponsor, KDOT will write the annual report in collaboration with agencies in the KDOT Program.
- TERM Scale: Facility condition assessments reported to the NTD have one overall TERM rating per facility. This rating is a value from 1 (poor) to 5 (brand new) and will cover all components of a facility (HVAC, roof, plumbing, office space, etc.) and then the specific scores will be averaged for a final score.

Target setting

As a Group Sponsor, KDOT (in coordination with most of the transit service providers in the rural and small urban areas and the MPOs in the Topeka, Lawrence, Manhattan, KS and St. Joseph, MO regions) has established a set of Targets for the Group Plan. Wichita Transit and the Wichita Area MPO and Kansas City Area Transit Agency and the Mid-America Regional Council have chosen to set their own targets and report those targets directly to FTA.

[Why we develop targets](#)

Setting targets enables a baseline of guidance when we consider the prioritization and allocation of resources available to the KDOT program. It assists us in managing current and future expectations, meets requirements set forth by FTA and KDOT, promotes accountability at the agency, MPO, and state levels, helps us consider the impact of future investment decisions, and give us an avenue for incorporating long term decision making into the greater long-term transportation planning processes happening throughout the state.

Targets are reviewed and reported annually and can be adjusted with each annual submission or Plan update if need be.

[Data and analysis processes](#)

KDOT will be using a combination of a Microsoft Excel table developed in-house (based on FTA's Asset Management Guide for Small Providers), our Black Cat grants management software, and facility scorecards completed by an external consultant, and annual KDOT inspection reports on every vehicle in our Program to collect data and run calculations for the unique fleet and needs of Kansas' providers.

[Decision support tools](#)

Decision support tools are an analytical process or methodology for group plan sponsors and participants to understand their underlying asset and condition data and make investment prioritization decisions. These tools have been developed to meet the specific needs of the vehicles in the KDOT Program. They may include policies adopted by KDOT or agreed upon by group plan participants to inform and guide investment prioritization and future funding decisions, as well as adjusting future targets.

Decision priority will be given to replace or repair any vehicle or facility as needed to meet the Americans with Disabilities Act (ADA) and FTA's accessibility guidance.

The collective fleet of vehicles under the Group Plan is straightforward, and so we will be using the following decision support tools in concert with the inventory data and condition facility assessments:

[Tool 1: The application review process](#)

When deciding on annual awards for funding, KDOT reviews the vehicles being requested to replace, the funding available for that year, and the agency's ability to contribute the required local match dollars for the purchase. We then review past passenger and mileage numbers to ensure that a new vehicle is warranted.

Tool 2: Vehicle Asset Inventory and condition reports from KDOT inspectors

We maintain an online database of fleet vehicles in our program (see Appendix D). These vehicles are all inspected at least annually by a KDOT inspector at one of our many district garages. The inspection reports are submitted to KDOT, noting any deficiencies or safety hazards.

Vehicles will be sorted, by agency, as to their age in relation to the established Useful Life Benchmarks for their vehicle category to determine which vehicles will be eligible for replacement, based on the amount of useful life they have left in them.

Vehicles will be sorted, by agency, as to their mileage to determine which vehicles are most appropriate for replacement, based on the thresholds published in the Group Plan.

Vehicles will be sorted, by agency, by the occurrence of irregular or recurring maintenance issues to determine which vehicles will be eligible for replacement, based on the costs of the repairs incurred.

Here are those calculations based on 2018 numbers:

Base vehicle replacement costs (with 3.5% Inflation annually)					
	2019	2020	2021	2022	2023
CU	\$60,000	\$62,100	\$64,274	\$66,523	\$68,851
VN	\$40,000	\$41,400	\$42,849	\$44,349	\$45,901
5311 Projected Investments (based on ULB)					
	2019	2020	2021	2022	2023
CU	99	14	20	20	31
VN	22	2	1	7	7
Cost	\$6,820,000	\$952,200	\$1,328,319	\$1,640,902	\$2,455,699
5311 Fleet Condition					
	#	Avg. year	% past ULB	Avg. TERM	Average mileage 2018 Replacement costs for all
CU	347	2012	29%	4	79,689 \$20,820,000
VN	122	2014	18%	4	62,161 \$4,880,000
AU	2	2004	100%	4	92,964 \$70,000
			Fleet replacement value (2018 dollars)		\$25,700,000

NOTE: We will not replace any remaining AU vehicles in our program and have instead decided to focus on vehicles that are accessible for all riders.

Tool 3: Vehicle Replacement Rating

A vehicle replacement score (see Appendix B) has been created to weigh the outcomes of the prior analyses at the rate of 20% age, 40% mileage, and 40% condition. Vehicles will be considered for replacement by order of weighted score on the Vehicle Replacement Scale. Once all vehicles eligible for replacement have been either funded

or deferred to a future year, remaining available funds may be considered for expansion.

Prioritizing investments

This component of the Group Plan will consider the larger financial constraints on local, state, and federal funds that may limit the action that can be taken toward achieving the desired goals after the three decision support tools have been used. This prioritizing, by design, will be an iterative process taking into consideration the overall fleet of vehicles in the KDOT Program and how best to meet or exceed the statewide targets set in the Group Plan.

Fiscal constraint

KDOT cannot program more funds than are reasonably expected to be available in future years. This includes the availability of match dollars from state, local, or other sources to complete the funding for any project in our Program. Decisions made as a result of the Group Plan data analysis may not be enacted in their entirety should funding not be available from any of the project participants to implement the recommended acquisitions, replacements, or repairs of a component of our state's asset inventory.

Approval of the Group Plan

The Accountable Executive of each agency participating in the Group Plan is expected to approve the plan and is ultimately responsible for implementation of the plan at the participant agency. While KDOT collaborates with transit agencies in determining investment prioritization, by participating in the Group Plan, a transit provider's Accountable Executive may be required to defer to the decisions in the Group Plan regarding prioritization of investments.

Reporting to the National Transit Database (NTD)

Participation in the Group Plan will not change how agencies already report data to NTD; any new data reporting requirements will also be reported through NTD. Agencies that have elected to not participate in the Group Plan are responsible for reporting all the necessary data to NTD directly. A list of NTD-assigned agency tracking numbers can be found in Appendix E.

Annual target setting

While TAM Plans are completed every four years, targets are set annually.

Accountable Executives do not need to approve the annual targets. Because implementing the Group Plan is the responsibility of each participating agency, KDOT is not able to guarantee the results of the Group Plan decisions. However, each transit agency should take actions to support the Group Plan as much as practicable, including working towards goal attainment. There are no financial rewards or penalties associated with target attainment.

Amending the Group Plan

While the Group Plan can be amended at any time (i.e. change in investment priorities, accommodating changes due to natural disaster, significant reduction of fleet, etc.), all TAM Plans must be updated every four years. The process of updating entails revisiting every element of the TAM Plan and making all necessary changes. In general, agencies are encouraged to align their updates with existing planning and programming processes, such as Metropolitan Transportation Plans, Transportation Improvement Plans, and annual Calls for Projects for transit-related funding.

Annual certification

Agencies participating in the Group Plan will be noted and reported annually. If there is a change in agency participation between scheduled updates, the Group Plan will be amended to ensure accurate tracking of participation. Each agency will be required to submit the following as a part of their annual Certifications and Assurances filings. Copies of these certifications and assurances from all participating agencies will be kept with the most current version of the Group Plan, in the appendices.

"I, name of Accountable Executive, confirm that I am the Accountable Executive for name of agency. I certify that my agency is in compliance with the TAM Rule. My agency has met the TAM Plan requirements by:

Participating in a Group Plan sponsored by sponsoring agency

Completing our own TAM Plan and keeping it up-to-date. I have provided an updated copy of our TAM Plan to name of Direct Recipient agency

We confirm that we are implementing the TAM Plan at our property.

Signed,

Accountable Executive signature

Date"

Agency Noncompliance

While KDOT will make every effort to reach full participant approval, there may be occasions where KDOT and the agency cannot reach an agreement. If an agency does not engage in the TAM process, KDOT will document and make FTA aware of their noncompliance. This noncompliance (or disapproval) of a TAM Plan may signal a more focused review of TAM regulations. Unless an agency provides written documentation otherwise, the expectation is that they participate in the Group Plan. If they do not provide the necessary data or do not have their Accountable Executive sign-off on the plan, the agency will be considered noncompliant and may become responsible for developing their own TAM Plan and providing KDOT annual certification that they are meeting TAM requirements.

TAM Plan: Initial Target chart description

There are three **Categories** that we must report on in Kansas:

1. Rolling Stock (revenue-producing vehicles)
2. Equipment (non-revenue producing vehicles)
3. Facilities (large scale)

Each Category is then split by **Class** of items. For the vehicles, it is split by vehicle type (minivan, cutaway, etc.) For the facilities, it is split into administrative, maintenance, parking, and passenger facilities.

The next column lists **Examples** of each item. These are merely for your reference. Your vehicles may differ (you may have a Dodge instead of a Ford, for example).

The **Abbreviations** category lists all the official abbreviations for each inventory item.

The **Based on** column lists how the asset will be scored in the TAM. All vehicles will be scored by their age, and all facilities will be scored on their condition.

The **FTA Useful Life** column lists the point at which FTA allows us to consider replacement of vehicles under extenuating circumstances.

The **KDOT Replacement threshold** lists where we have said we will consider replacement of vehicles under extenuating circumstances (please note, KDOT has always been a little more stringent than the FTA requirements.) You will see that there is no replacement threshold for facilities; we will consider their repair and/or replacement on a case-by-case basis, knowing that repair will always be our first thought.

The **Useful Life Benchmark** column lists the number of years (for vehicles) or TERM score (for facilities) at which we will be considering our inventory. Basically, this number is the point at which we can reasonably consider a vehicle or facility to last in usable condition.

Finally, the **Performance Target** column lists at what value we would like to set our initial targets for the Group Plan:

- **Rolling stock revenue vehicles = 25%**, meaning that every year at inventory time, no more than 25% of the fleet (statewide, not by agency) will have passed their ULB and still be in service.
- **Equipment non-revenue vehicles = 75%**, meaning that every year at inventory time, no more than 75% of the non-revenue vehicles (statewide, not by agency) will have passed their ULB and still be in service.
- **Facilities = 25%**, meaning that every year at inventory time, no more than 25% of the facilities in service to public transit (statewide, not by agency) will have scored a 3.0 or lower on the FTA TERM Scale (where 5.0 = brand new building and 1.0 = recommended for demolition).

Transit Facility Review: Flint Hills Area Transportation Agency
Date: August 8, 2018

Reviewer: Lisa Koch, Groundswell Consulting

Introduction:

Lisa Koch, Groundswell Consulting, visited Flint Hills Area Transportation Agency's Administrative, and Maintenance Facility at 2:00 pm on August 9th, 2018. Anne Smith provided a full tour of the facility and answered all questions that were asked during the review.

Year Built: 2013

Administration and Maintenance Area: 11,250 square feet

Transit Asset Management (TAM) Facilities Scorecard

Rating	Condition	Description
5	Excellent	No visible defects, new or near new condition, may still be under warranty if applicable
4	Good	Good condition, but no longer new, may be slightly defective or deteriorated, but is overall functional
3	Adequate	Moderately deteriorated or defective; but has not exceeded useful life
2	Marginal	Defective or deteriorated in need of replacement; exceeded useful life
1	Poor	Critically damaged or in need of immediate repair; well past useful life

Administrative and Maintenance Facilities

Administrative Facilities - Administrative facilities are typically offices that house management and supporting activities for overall transit operations such as accounting, finance, engineering, legal, safety, security, customer services, scheduling, and planning. They also include facilities for customer information or ticket sales, but that are not part of any passenger station.

Maintenance Facilities - Maintenance facilities are those where routine maintenance and repairs or heavy maintenance or unit rebuilds are conducted. Agencies must not report maintenance facilities where third-party vendors perform services, such as a local gasoline service or body shop. Note that characterizing a facility as one maintenance facility type over another will not alter the maintenance and administrative facility performance measure. For extensive list and definitions of maintenance facility types visit the NTD glossary.

Primary Category	Secondary Category	5 Excellent	4 Good	3 Adequate	2 Marginal	1 Poor

	<i>Materials</i>		X			
	<i>Insulation</i>		X			
	<i>Slab</i>		X			
	<i>Floor Underpinnings</i>		X			

Given its age (less than 10 years), the facility is in good condition. The flooring in the maintenance facility has some cracking, which has been repaired.

Primary Category	Secondary Category	5 Excellent	4 Good	3 Adequate	2 Marginal	1 Poor
Equipment	<i>Equipment related to the function of the facility, including maintenance or vehicle service equipment – does not include supplies</i>		X			

Primary Category	Secondary Category	5 Excellent	4 Good	3 Adequate	2 Marginal	1 Poor
Site	<i>Roadways/driveways and associated signage, markings, and equipment</i>		X			
	<i>Parking lots and associated signage, markings, and equipment</i>		X			
	<i>Pedestrian areas and associated signage, marking, and equipment</i>		X			
	<i>Site Development such as fences, walls, and structures</i>		X			
	<i>Landscaping</i>		X			
	<i>Irrigation</i>		X			
	<i>Site Utilities</i>		X			

The driveway and parking lot of the facility is currently concrete showing wear that is consistent with its use and age.

Transit Facility Review: Finney County Transit

Date: August 9, 2018

Reviewer: Sarah Frost, TranSystems

Introduction:

Sarah Frost, TranSystems, visited Finney County Transit's Administrative and Maintenance Facility at 1:00 PM on August 9, 2018. Marcy Duncan, Executive Director, provided a full tour of the facility and answered all questions that were asked during the review. Prior to the facility review, Marcy provided the 2017 Annual Building Inspection Checklist.

Year Built: 2009

Administration Area: 2,111 square feet

Mechanical Area and Vehicle Storage: 10,057 square feet

Transit Facility Review: Access Transportation, DSNWK
Date: August 10, 2018

Reviewer: Sarah Frost, TranSystems

Introduction:

Sarah Frost, TranSystems, visited Access Transportation, DSNWK's Administrative and Maintenance Facility located at 1205 East 22nd Street, Hays, Kansas at 10:00 AM on August 10, 2018. Wade Kruse, Transportation Manager, provided a full tour of the facility and answered all questions that were asked during the review. Prior to the facility review, Wade provided the 2017 Annual Building Inspection Checklist.

Year Built: 2005

Administration Area: 2,963 square feet

Mechanical Area and Vehicle Storage: 14,353 square feet

Figure 1: Access Transportation, DSNWK's Administration and Maintenance Facility (Photo: TranSystems)

**Transit Asset
Management (TAM) Facilities Scorecard**

Rating	Condition	Description
5	Excellent	No visible defects, new or near new condition, may still be under warranty if applicable
4	Good	Good condition, but no longer new, may be slightly defective or deteriorated, but is overall functional
3	Adequate	Moderately deteriorated or defective; but has not exceeded useful life
2	Marginal	Defective or deteriorated in need of replacement; exceeded useful life
1	Poor	Critically damaged or in need of immediate repair; well past useful life

Administrative and Maintenance Facilities

Administrative Facilities - Administrative facilities are typically offices that house management and supporting activities for overall transit operations such as accounting, finance, engineering, legal, safety, security, customer services, scheduling, and planning. They also include facilities for customer information or ticket sales, but that are not part of any passenger station.

Maintenance Facilities - Maintenance facilities are those where routine maintenance and repairs or heavy maintenance or unit rebuilds are conducted. Agencies must not report maintenance facilities where third-party vendors perform services, such as a local gasoline service or body shop. Note that characterizing a facility as one maintenance facility type over another will not alter the maintenance and administrative facility performance measure. For extensive list and definitions of maintenance facility types visit the NTD glossary.

Date: August 8, 2018

Reviewer: Sarah Frost, TranSystems

Introduction:

Sarah Frost, TranSystems, visited OCCK, Inc.'s Administrative and Maintenance Facility at 2:00 pm on August 8, 2018. Pat Wallerius and Michelle Griffin, OCCK, Inc. staff, provided a full tour of the facility and answered all questions that were asked during the review. Prior to the facility review, Pat provided the 2017 Annual Building Inspection Checklist.

Year Built: Administration and Maintenance Area: 1940's, Renovated in 2004, 2005, Second Floor Renovation 2016, Paint and Wash Bays, 2011

Administration Area: Approximately 5,000 square feet

Maintenance Area and Vehicle Storage: 13,150 square feet

Note: Some ratings varied between the Administrative and Maintenance Areas. These are denoted in the ratings tables with "A" and "M" respectively.

Figure 1: OCCK, Inc. Administrative and Maintenance Facility (Photo: TranSystems)

Transit Facility Review: Reno County Area Transportation

Date: August 3, 2018

Reviewer: Lisa Koch, Groundswell Consulting

Introduction:

Lisa Koch, Groundswell Consulting, visited Reno County Area Transportation's Administrative, Maintenance and Passenger Transfer Facility located at 120 Avenue B, Hutchinson, Kansas at 9:00 am on August 3rd, 2018. Barbara Lilyhorn and Harlen Depew, Reno County staff, provided a full tour of the facility and answered all questions that were asked during the review. Prior to the facility review, Barbara and Harlen provided the 2017 Annual Building Inspection Checklist and all facility maintenance projects for the past year. Since the facility primarily serves an administrative and maintenance purpose, with some transfer activities, the administrative and maintenance facility checklist was used.

Year Built: 2008

Administration and Maintenance Area: 22,663 square feet

Figure 1: Reno County Administrative, Maintenance and Passenger Facility (Photo: Groundswell Consulting)

Transit Asset Management (TAM) Facilities Scorecard

Rating	Condition	Description
