Washington, DC - Overall, the fiscal year 2012 Transportation, Housing and Urban Development, and Related Agencies Appropriations bill includes budget authority of $55.3 billion, $100 million less than the 2011 enacted level. Total funding, including limitations on obligations related to programs funded by the Highway Trust Fund, is $109.5 billion. The total funding level is $100 million or 0.1 percent below the equivalent 2011 enacted level.

“As we put together the legislation that funds critical pieces of our federal government, we must do everything we can to cut spending in a responsible way—but we must also make sure we are investing in our future and protecting the most vulnerable among us. And working together, I believe we have accomplished that with the legislation before us here today. It preserves housing assistance for low-income families and veterans, and it continues investments in our nation’s roads, bridges, transit systems and airports.” – Senator Patty Murray, (D-Wash.), Chairman

The bill helps our communities and transportation system by focusing on five priority areas:

- Investing in transportation infrastructure;
- Providing housing and services to our Nation’s most vulnerable;
- Supporting our communities and addressing the foreclosure crisis;
- Ensuring the safety of our transportation system; and
- Promoting sustainability in our communities.
Investing in transportation infrastructure

**Funding for Significant Transportation Projects (“TIGER” program):** $550 million for grants to support significant transportation projects in a wide variety of modes, including highways and bridges, public transportation, passenger and freight railroads, and port infrastructure. The bill requires the Secretary to allocate no less than $120 million for projects in rural communities. The funding level included in the bill is $23 million higher than the fiscal year 2011 enacted level.

**Highway Investments:** $41.1 billion for the Federal-aid Highway program to support essential investments in roads and bridges in every State across the country. This funding level is equal to the fiscal year 2011 enacted level. The bill does not include any rescission of budgetary resources from the highway program. The appropriations act for fiscal year 2011 included $3.1 billion in rescissions of unused highway resources provided in previous years.

**Transit Investments:** An additional $358 million above the fiscal year 2011 enacted level for the transit “New Starts” program. This funding supports projects across the Nation that will provide new or expanded public transportation services.

**Airport Investments:** $3.5 billion for capital investments at airports across the country.

**Providing housing and services to our Nation’s most vulnerable**

**Section 8 Tenant-based rental assistance:** $18.9 billion for housing choice vouchers. This level of funding is $501 million above the fiscal year 2011 enacted level. This funding is critical to ensuring that our Nation’s low-income families, especially those hit hard by the recession, can maintain safe, affordable housing. It includes:

- $17.14 billion for the renewal of current housing choice vouchers and $1.4 billion for program administration;
- $75 million for 11,000 new HUD-Veterans Affairs Supportive Housing (HUD-VASH) vouchers for homeless veterans;
- $60 million for the Family Self-Sufficiency program; and
- $5 million to support a homeless demonstration program.

**Public Housing:** $1.9 billion for the public housing capital fund, a decrease of $165 million below the fiscal year 2011 enacted level. This funding will help preserve and improve public housing. The bill also includes $4 billion for the public housing operating fund, which is $655 million below the fiscal year 2011 enacted level. The language allows the Secretary to offset PHA’s excess reserves, but limits the allowable offset to $750 million.

**Project-based rental assistance:** $9.4 billion for the project-based section 8 program, including over $9.1 billion for the renewal of all expiring project-based contracts for a full 12 months. This level of funding is $161 million above the fiscal year 2011 enacted level.
**Homeless Assistance grants:** $1.9 billion for homeless assistance grants. This level of funding is equal to the fiscal year 2011 enacted level. In response to the increase in family homelessness, the bill includes $286 million for the Emergency Solutions Grant program to prevent families from becoming homeless, or rapidly re-house those that are homeless.

**Native American housing block grants:** $650 million for Native American housing block grants. This level of funding will support the housing and community development needs of Native Americans.

*Supporting our communities and addressing the foreclosure crisis*

**Community Development Block Grants (CDBG):** $2.85 billion is provided for CDBG grant funding for States and communities across the Nation. This is $485 million below the fiscal year 2011 enacted level. This funding will assist states and communities that are still struggling as the economy recovers with their continued efforts to invest in and support the needs of low-income communities.

**HOME Investment Partnership:** $1 billion for the HOME Investment Partnership program, which is $607 less than the fiscal year 2011 enacted level. This funding supports the creation and rehabilitation of low-income housing across the country. The bill also includes reforms to ensure that funds are used in a timely fashion for worthy projects.

**Housing Counseling:** A total of $125 million for housing counseling efforts. This includes $60 million for HUD’s housing counseling activities, including Home Equity Conversion Mortgage (HECM) counseling and pre-purchase counseling. In addition, $65 million is included to continue the National Foreclosure Mitigation Counseling program that began in fiscal year 2008.

*Ensuring the safety of our transportation system*

**Automobile Safety:** $800 million for vehicle and driver safety programs, which will support research into the causes of sudden unintended acceleration and identify ways to improve vehicle crash worthiness. The bill also provides funds for performance and incentive grants to States that enact distracted driver laws.

**Pipeline and Hazardous Materials Safety:** Includes $81 million to support pipeline safety inspections and administer special permits and approvals for the transportation of hazardous materials. This funding will improve the agency’s ability to ensure the safety of the interstate pipeline infrastructure and the transportation of hazardous materials across the Nation.

**Aviation Safety:** $8 million is provided to hire an additional 71 aviation safety inspectors.

**Transit Safety:** $150 million is provided for grants to the Washington Metropolitan Area Transit Authority (WMATA) for capital investments. The bill includes language requiring WMATA to place the highest priority on projects that will improve the safety of the transit system.
**Promoting sustainable communities**

**Sustainable Communities Initiative**: $90 million within HUD’s Community Development Fund to promote integrated housing and transportation planning. Joining HUD in this initiative will be the Department of Transportation and the Environmental Protection Agency. The funding included in the bill will provide grants for integrated housing and transportation planning efforts on both the regional and local level.

**Choice Neighborhoods**: $120 million for HUD’s Choice Neighborhoods Initiative. This initiative will expand the successful HOPE VI program. Last year, $65 million was included for Choice Neighborhoods as a set-aside within HOPE VI. While continuing to focus on improving public housing, it also will address the needs of other HUD-assisted housing. In addition to improving housing and revitalizing poor communities, it also promotes better access to schools, transportation, jobs and other services.

**Transit Energy Efficiency Grants**: $25 million for grants to help transit agencies make cutting-edge and innovative capital investments that will reduce the energy consumption or greenhouse gas emissions of their operations.
