

Introducing New Technology Buses Into Your Fleet

Mike Finnern
Director of Customer Service

New Ideas

New Plan

- Many new ideas and technologies in the market
- Can benefit from thorough approach to adoption
- Processes scale for many new tech projects
 - New buses
 - New fare collection
 - New ITS
 - New anything!

Advanced Simulation

- Modern computer modeling and analytics
 - Use data to make decisions!
 - Route simulation
 - Best routes to select
 - Expected performance
 - Test “what if?” cases
 - Computing payback and benefits
 - Distributed workforce
 - Ask OEM

- Simulation of real route using real GPS data.

- Route details:

Route Name	Route 62 Purple Circuit
Distance	2.70 miles
Duration	15.25 minutes
Average Speed	11 mph
Maximum Speed	31.5 mph
Maximum Grade	~±10%

- Simulation Results:

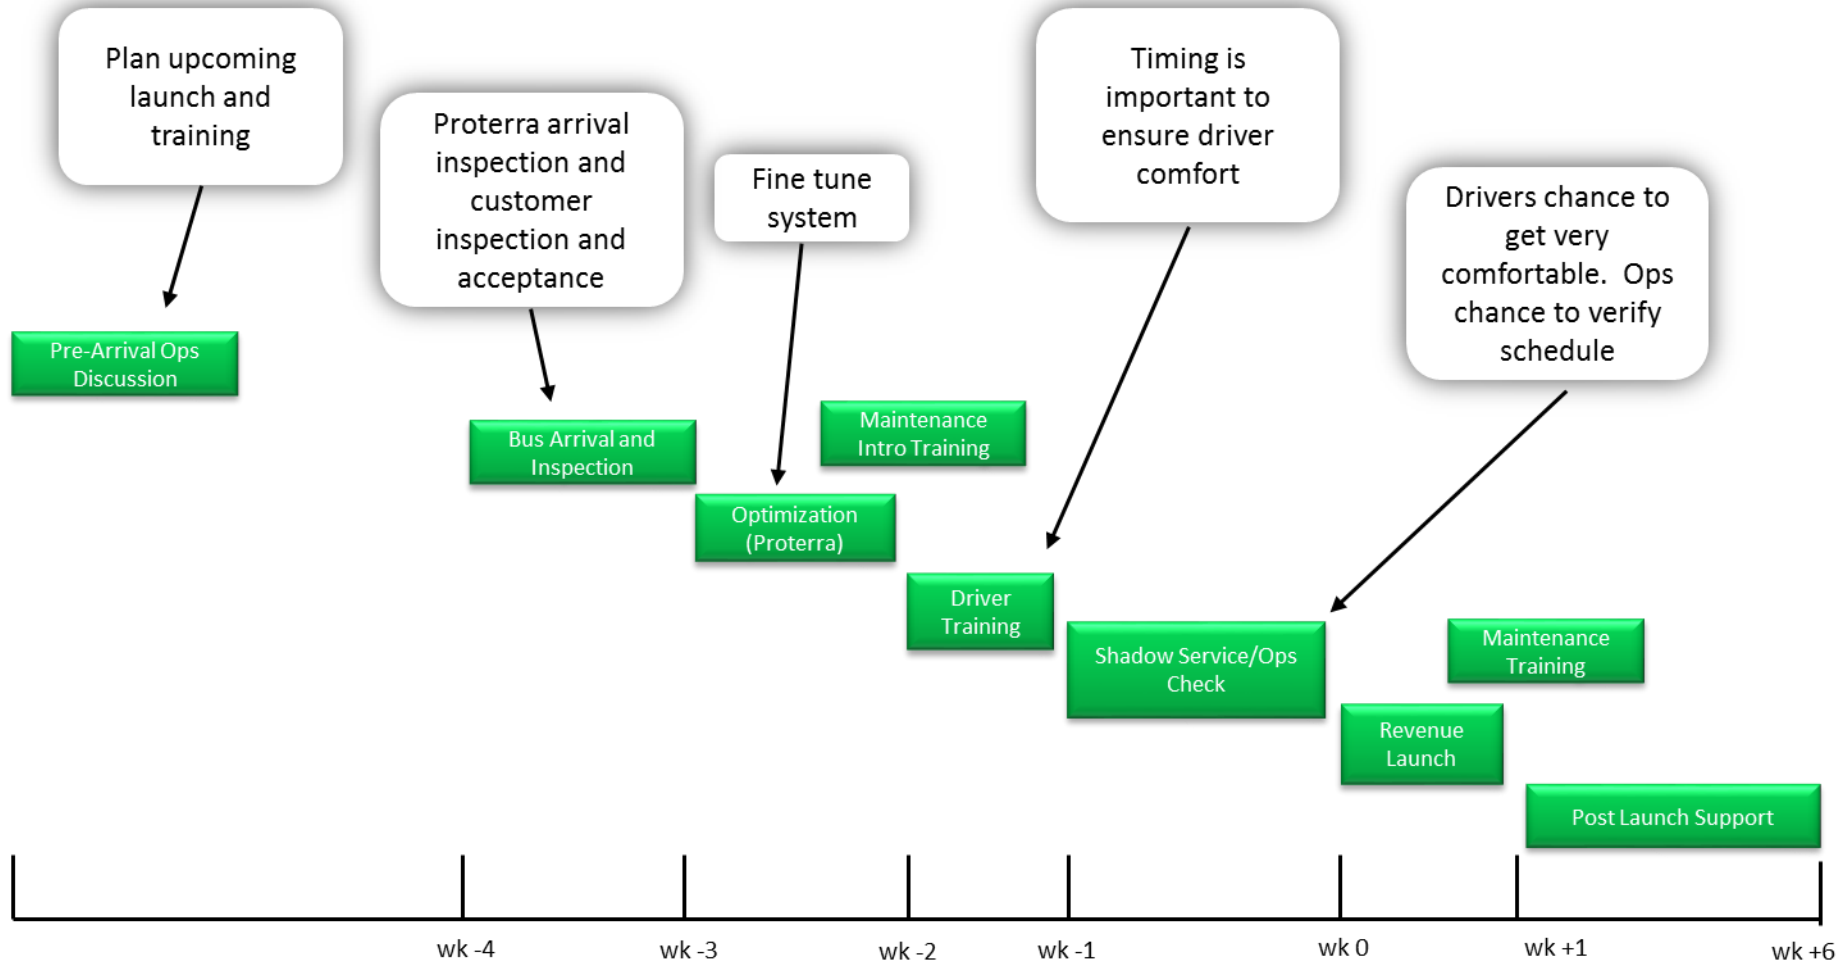

Total Propulsion Energy	6.85 kWh
Accessory Energy	0.51 kWh
HVAC Energy	0.24 kWh
Energy Recaptured	(2.46)kWh
Net Energy Consumed	5.14 kWh
Final Battery SOC	89.52 %
Average Efficiency	1.91 kWh/mi
Charge Time Required (Inc. Dock)	3.0 min

Launch Process

Careful Planning for Success

Pre-Plan

Careful Planning for Success

- Onsite meeting at customer facility
- ~2 months ahead of revenue service launch
- Get ALL parties together
 - Drivers
 - Maintenance Team
 - Planning
 - Ops
 - Procurement
 - Trainers
 - OEM
- Let folks get comfortable with the technology or idea
- Develop detailed plan on launch involving lessons learned

Fine Tune

Get It Dialed-In

- OEM onsite for final testing
- Fine tuning prior to “hand-over”
- Increase effectiveness of training
- Last chance to adopt system perfectly to usage

Training

Building Confidence

- People are generally eager to learn
- Timing of training is critical
 - Minimize time between training and use
 - 2 weeks before launch for drivers
 - Shadow service testing immediately before start revenue service
- New techniques effective
 - Quick reference guides
 - Short videos
 - Block diagrams and flow charts
- Key is building confidence with people responsible for day to day operations

Optimization

Unlocking Performance Post-Launch

- Using data again
- Reporting and review with OEM
- May find surprising impacts
 - Driver behavior
 - HVAC impact
- Maintenance optimization
 - PMI
 - Parts
- Utilize a champion

Accel Pedal

Efficiency Histogram

Questions

Utilize The OEM

- Use data to make decisions
- Bring the whole team up to speed
- Train the right amount at the appropriate time
- Optimize for new technology

QUESTIONS?
