By income and access to public transit

# Uber "Smart Routes"

"We have begun testing a new feature to streamline the uberPOOL experience for both riders and drivers. This experimental feature, called 'Smart Routes', aims to simplify pick-ups by encouraging riders to request a ride along specific routes in San Francisco, Smart Routes is part of our ongoing efforts to increase the efficiency of driver-partners' time spent on the road while helping riders save time and money."

> -Uber CEO Aug, 2015

# Uber "Flat Fares"

#### How to get flat fares

#### Buy

Purchase a \$20 package to lock in flat fares for up to 20 trips or a \$30 package to lock in flat fares for up to 40 trips.

#### Ride

From weekday to weekends, you'll only pay \$2 on uberPOOL or \$7 on uberX when your trip begins and ends north of Cesar Chavez St. in San Francisco.

#### Repeat

You're all set. Flat fare pricing is valid September 1 through September 30.

Trips eligible within designated zone. See map for detailed information.

"[In] San Francisco I can choose from a package of 20 trips for \$20 or 40 trips for \$30 for September...I have either 20 or 30 rides to use at a flat-fare price...If someone takes all 20 rides on UberPool, then they'll be paying a total of \$60 for 20 rides, or only \$3 a piece. In San Francisco, that's only \$0.75 more than the bus and way less than the \$5 to \$8 I typically pay for an UberPool ride."

> -Business Insider Aug, 2016

"Lyft has a new offering in testing called Shuttle, which is part of its Lyft Line commuter ride sharing option, and which operates along a set route with specific pickup and drop-off points. The trial for Shuttle is currently an offer in San Francisco and Chicago, and is intended to offer increased reliability for users who tend to travel the same path every day. Shuttle also includes fixed rate fare, which are not impacted by Prime Time, where increased demand causes normal Lyft pricing to rise"

> TechCrunch March 2017

# Uber and Parking

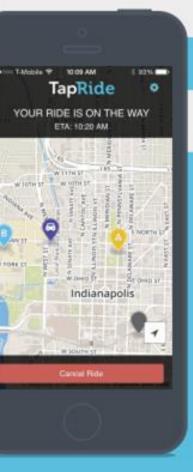

"In Washington, D.C., the consequences are tremendous.
Already, apartment buildings that used to have waiting lists for parking spaces now have empty spaces.

Many downtown buildings in Washington have some 20 percent less income from parking than before Uber and convenient short-term car rentals came about."

- The American Conservative, January 2015 "Just a few months after being nearly broke, Lehigh Valley International Airport has millions of dollars in the bank and it's seeing its highest passenger counts in four years. Yet, its parking revenues have fallen \$220,000 under budget so far this year.

Even though more passengers are using the airport, fewer of them are parking in the lots. Rather than plunking down the \$22 a day rate to leave their cars in the lot, at least some passengers are pinging the phone of one of the growing number of Uber drivers roaming the streets of the Lehigh Valley.

The Morning Call, October 2016

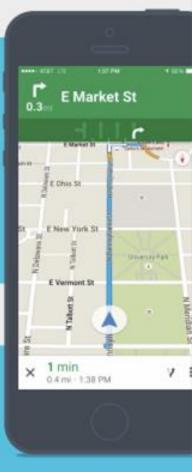

## For Riders

Request a ride with a tap and watch it arrive in real-time.

## **For Drivers**

Receive pickup assignments in real-time and turn by turn navigation on how to get there.

## For Dispatchers

Manage all activity from a dispatcher dashboard.

## For Administrators

Optimize your system efficiency through reporting capabilities know your busiest time of day, and average wait time.
