## RIDERSHIP INCREASES IN THIRD QUARTER

Public transportation ridership in the third quarter of 2011 increased 2 percent over 2010. Over 51 million more trips were taken on public transportation in the third quarter compared to the same period last year. Ridership increased across all modes. Improving regional economic conditions, higher gas prices, and new service extensions all contributed to the increase.

In Boston, public transit ridership increased across all modes at nearly a 5 percent rate. The employment picture in the metro area is improving and service has been increased on the Orange Line in response to increasing ridership. Riders also cite improved access to real-time arrival information for buses and trains as reasons to pick public transit over other modes.

In Dallas, a new light rail extension opened in December 2010. A new commuter rail line opened in April 2011 that connects riders from outer suburbs to light rail. Many riders with long commutes may be switching to public transit to avoid high gas prices. Both of these projects are driving ridership on the light rail system, where trips are up 36 percent. Strong economic and population growth in the metro area is also fueling transit ridership increases.

In the San Francisco bay area, public transit systems are seeing ridership increases across the board. An improving economic picture and increasing employment is contributing to more riders on public transportation, with ridership on BART up six percent. Commuter rail lines Altamont Commuter Express and Caltrain saw large increases as people with longer commutes moved to public transit in order to avoid higher gas prices.

In Phoenix, transit ridership has increased over 12 percent. A strong economy and increasing employment has pushed ridership beyond expectations on the light rail system. New development projects around light rail stations have pushed interest in expanding the system. The FTA recently awarded New Starts funding to a 3.1-mile extension of the light rail system.

Increased public transportation ridership may prove to be a sign of strengthening economies in several regions around the country. As more Americans return to work, public transportation serves as an economical part of their daily lives.

**Higher gas prices, improved real-time passenger information, and a recovering economy contributed to the increase.**

## **Acknowledgements**

The APTA ridership report is a quarterly report of transit passenger ridership for U.S. and Canadian transit agencies. The report includes quarterly and year-to-date estimated unlinked transit passenger trips for the current and previous year by transit mode. In addition, agency specific ridership is provided for participating transit agencies. Reports are published approximately 60-75 days after the end of the quarter.

APTA is the leading force in advancing public transportation.

APTA members are public organizations that are engaged in the areas of bus, paratransit, light rail, commuter rail, subways, waterborne passenger services, and high-speed rail. Members also include large and small companies who plan, design, construct, finance, supply, and operate bus and rail services worldwide. Government agencies, metropolitan planning organizations, state departments of transportation, academic institutions, and trade publications are also part of our membership.

\* Preliminary information based on data from reporting systems.

Note: Data may differ from that included in Federal Transit Administration reports due to differences in data calculation procedures and in periods of time covered.

(a) Transit agencies assigned by urbanized areas or urban places of less than 50,000 population outside urbanized areas based on 2000 U.S. Census Population.

(b) Year-to-date ridership adjusted for data received after closing dates of previous issues.
