Transit Challenges. Practical Solutions.

Economic Evaluation

- Report 196**
Private Transit: Existing Services and Emerging Directions
This report provides information about private transit services and ways they are addressing transportation needs in a variety of operating environments. The document provides an overview and taxonomy of private transit services in the United States, a review of their present scope and operating characteristics, and a discussion of ways they may affect the communities in which they operate along with several case studies and other supporting information.
- Report 186**
Economic Impact Case Study Tool for Transit
This report presents the results of a project aimed at creating the prototype for a searchable, web-based database of public transit investment projects and their associated, transit-driven economic and land development outcomes.
- Report 177**
Preliminary Strategic Analysis of Next Generation Fare Payment Systems for Public Transportation
This report explores attributes, implementation strategies, and applications of next generation transit fare payment systems.
- Synthesis 190**
Guide to Value Capture Financing for Public Transportation Projects
This report identifies the requirements necessary for successful value creation through transportation infrastructure investment and capturing a portion of that value through specific value capture mechanisms.
- Synthesis 137**
Microgrids and Their Application for Airports and Public Transit
This report describes microgrids that airports and public transit agencies can implement to increase resilience of their critical infrastructure. A microgrid is described as a collection of loads, on-site energy sources, local energy storage systems, and an overarching control system.
- Synthesis 128**
Practices for Evaluating the Economic Impacts and Benefits of Transit
This report provides state-of-the-practice information for transit agencies to help them in incorporating economic benefits and impacts into their decision-making processes, which may lead to more sustainable funding solutions for transit agencies.
