Transit Challenges. Practical Solutions.

Planning

- Report 204**
Partnerships Between Transit Agencies and Transportation Network Companies
This report is designed to help transit agencies that have decided to pursue partnerships with one or more TNCs. The report provides information on where, when, and how partnerships between transit agencies and TNCs should be considered and pursued.
- Report 203**
Dialysis Transportation: Intersection of Transportation and Healthcare
The report responds to major concerns of public transportation agencies about the rising demand and costs to provide kidney dialysis trips and about experiences showing these trips require service more specialized than public transportation is designed to provide.
- Report 201**
Understanding Changes in Demographics, Preferences, and Markets for Public Transportation
This report explores how changes in demographics, traveler preferences, and markets for public transportation affect transit ridership now and in the future. Additionally, it explores how an individual's demographics affect their long-term values, their current attitudes, and the type of neighborhood they choose to live in. Each of these factors also affects their likelihood to ride transit.
- Report 197**
Tools for a Sustainable Transit Agency
This report explores the development of two practical tools for improving sustainability at transit agencies: (1) The Sustainability Routemap: An interactive PDF, similar to a website, that guides the user to improve a transit agency's sustainability program through application of change management principles, best practice examples, and references to online tools. (2) The S+ROI Calculator: An Excel workbook that quantitatively evaluates potential sustainability projects in terms of financial, social, and environmental returns.
- Report 196**
Private Transit: Existing Services and Emerging Directions
This report provides information about private transit services and ways they are addressing transportation needs in a variety of operating environments. The document provides an overview and taxonomy of private transit services in the United States, a review of their present scope and operating characteristics, and a discussion of ways they may affect the communities in which they operate along with several case studies and other supporting information.
- Report 195**
Broadening Understanding of the Interplay Between Public Transit, Shared Mobility, and Personal Automobiles
This report explores how shared modes—and ridesourcing companies in particular—interact with the use of public transit and personal automobiles.
- Synthesis 141**
Microtransit or General Public Demand-Response Transit Services: State of the Practice
This report provides an overview of the current state of the practice of transit systems that are directly providing general public demand-response or microtransit with their own vehicles and personnel or using a traditional contractor.
- Synthesis 135**
ADA Paratransit Service Models
This report provides information about current Americans with Disabilities Act (ADA) compliant paratransit service models and the underlying reasons why specific transit agencies have opted to keep or change their service model.
