Transit Challenges. Practical Solutions.

- Report 204**  
**Partnerships Between Transit Agencies and Transportation Network Companies**  
This report is designed to help transit agencies that have decided to pursue partnerships with one or more TNCs. The report provides information on where, when, and how partnerships between transit agencies and TNCs should be considered and pursued.
- Report 203**  
**Dialysis Transportation: Intersection of Transportation and Healthcare**  
The report responds to major concerns of public transportation agencies about the rising demand and costs to provide kidney dialysis trips and about experiences showing these trips require service more specialized than public transportation is designed to provide.
- Report 202**  
**Handbook for Examining the Effects of NEMT Brokerages on Transportation Coordination**  
This report is a handbook for Examining the Effects of NEMT Brokerages on Transportation Coordination. The Medicaid program is the largest federal program for human services transportation, spending approximately \$3 billion annually on Non-Emergency Medical Transportation (NEMT).
- Report 201**  
**Understanding Changes in Demographics, Preferences, and Markets for Public Transportation**  
This report explores how changes in demographics, traveler preferences, and markets for public transportation affect transit ridership now and in the future. Additionally, it explores how an individual's demographics affect their long-term values, their current attitudes, and the type of neighborhood they choose to live in. Each of these factors also affects their likelihood to ride transit.
- Report 197**  
**Tools for a Sustainable Transit Agency**  
This report explores the development of two practical tools for improving sustainability at transit agencies: (1) The Sustainability Routemap: An interactive PDF, similar to a website, that guides the user to improve a transit agency's sustainability program through application of change management principles, best practice examples, and references to online tools. (2) The S+ROI Calculator: An Excel workbook that quantitatively evaluates potential sustainability projects in terms of financial, social, and environmental returns.
- Report 196**  
**Private Transit: Existing Services and Emerging Directions**  
This report provides information about private transit services and ways they are addressing transportation needs in a variety of operating environments. The document provides an overview and taxonomy of private transit services in the United States, a review of their present scope and operating characteristics, and a discussion of ways they may affect the communities in which they operate along with several case studies and other supporting information.
- Synthesis 130**  
**Battery Electric Buses**  
This report documents current practices of transit systems in the planning, procurement, infrastructure installation, operation, and maintenance of battery electric buses (BEBs). The synthesis is intended for transit agencies that are interested in understanding the potential benefits and challenges associated with the introduction and operation of battery electric buses. The synthesis will also be valuable to manufacturers trying to better meet the needs of their customers and to federal, state, and local funding agencies and policy makers.
