Transit Challenges. Practical Solutions.

Rural and Paratransit

- **Report 204**
Partnerships Between Transit Agencies and Transportation Network Companies
This report is designed to help transit agencies that have decided to pursue partnerships with one or more TNCs. The report provides information on where, when, and how partnerships between transit agencies and TNCs should be considered and pursued.
- **Report 203**
Dialysis Transportation: Intersection of Transportation and Healthcare
The report responds to major concerns of public transportation agencies about the rising demand and costs to provide kidney dialysis trips and about experiences showing these trips require service more specialized than public transportation is designed to provide.
- **Report 188**
Shared Mobility and the Transformation of Public Transit
This report examines the relationship of public transportation (including paratransit and demand-responsive services) to shared modes, including bikesharing, carsharing, microtransit, and ridesourcing services provided by companies such as Uber and Lyft. Additionally, it examines issues and explores opportunities and challenges as they relate to technology-enabled mobility services, including suggesting ways that transit can learn from, build upon, and interface with these new modes.
- **Synthesis 141**
Microtransit or General Public Demand–Response Transit Services: State of the Practice
This report provides an overview of the current state of the practice of transit systems that are directly providing general public demand–response or microtransit with their own vehicles and personnel or using a traditional contractor.
- **Synthesis 135**
ADA Paratransit Service Models
This report provides information about current Americans with Disabilities Act (ADA) compliant paratransit service models and the underlying reasons why specific transit agencies have opted to keep or change their service model.
