Transit Challenges. Practical Solutions.

Safety and Security

Report 185
Bus Operator Workstation Design for Improving Occupational Health and Safety

This report provides guidance to transit agencies and bus manufacturers as they integrate emerging technologies into current procurement practices and improve bus operator workstation design.

Report 180
Policing and Security Practices for Small-and-Medium-Sized Public Transit Systems

The report explores the current state of practice and identifies and responds to the specific challenges and issues associated with the security of small-and medium-sized transit agencies. It follows the five stages of protection activity by providing baseline options and identifying potential security countermeasures.

Report 175
Guidebook on Pedestrian Crossing of Public Transit Rail Services

This report presents a wide array of engineering treatments designed to help improve pedestrian safety for three types of public transit rail services: light rail, commuter rail, and streetcar.

Synthesis 137
Microgrids and Their Application for Airports and Public Transit

This report describes microgrids that airports and public transit agencies can implement to increase resilience of their critical infrastructure. A microgrid is described as a collection of loads, on-site energy sources, local energy storage systems, and an overarching control system.

Synthesis 126
Successful Practices and Training Initiatives to Reduce Bus Accidents and Incidents at Transit Agencies

This report documents current practices and training initiatives, including bus operator training and retraining programs that have been effective in reducing accidents and incidents at transit agencies.

Synthesis 123
Onboard Camera Applications for Buses

This report explores the current technologies, research, and opportunities for use. It also provides examples of how surveillance systems are used to improve operations, safety, security, training, and customer satisfaction.
